Subject Index

Absorption

Absorbing-Generating Boundary Condition for Shallow Water Models, 1394

Absorption and Sorptivity of Cover Concrete, 966

Numerical Generation and Absorption of Fully Nonlinear Periodic Waves, 334

Abutments

Earthquake Characteristics of Bridges with Integral Abutments, 1196

Acceleration

New Transition Curve Joining Two Straight Lines, 1284

Response of Olive View Hospital to Northridge and Whittier Earthquakes, 1073

Seismic Response of Shallow Foundation on Liquefiable Sand, 581

SPT Dynamic Analysis and Measurements, 618

Accelerometers

Correction Factor for Measured Natural Frequencies in Beams, 287

Response of Olive View Hospital to Northridge and Whittier Earthquakes, 1073

Accident factors

Using Accident Correctability to Identify Accident-Prone Locations, 1253

Accident prevention

Intelligent Technology for Truck Crane Accident Prevention, 181

On-Line Assistance for Crane Operators, 127

Using Accident Correctability to Identify Accident-Prone Locations, 1253

Accident risks

Event Tree Analysis of Lock Closure Risks, 1334

Accreditation

Engineering Perceptions of ABET Accreditation Criteria, 1018

Accuracy

Accuracy Assessment of Digitized Data with Randomized Block Model, 1233

Digital Terrain Model: Elevation Extraction and Accuracy Assessment, 1231

Mapping with a Differential, 1481

Numerical Integrators for Elastic-Secondary Creep, 296

Acetate

Sulfate-Reducing Bacteria in Anaerobic Propionate Systems, 446

Acids

Acid Buffering a High pH Soil for Zinc Diffusion, 550

Effect of Sulfate on Anaerobic Degradation of Benzoate in UASB Reactors, 404

Treatment of Phthalic Waste by Anaerobic Hybrid Reactor, 497

Acoustic waves

Acoustic Emission Source Location Using Lamb Wave Modes, 230

Evaluation of Pultruded FRP Composites for Structural Applications, 972

Acoustics

Acoustic Emission and Anisotropic Expansion when Heating Marble, 986

Acoustic Velocity Profiler for Laboratory and Field Studies, 762

Damage and Failure Analysis of Brittle Materials by Acoustic Emission, 979

Acquisition

The Art of the Deal, 1497

Activated carbon

Accumulation of Metabolic Intermediates during Shock-Loads in Biological Fluidized Bed Reactors, 509

Anaerobic Fluidized Bed Pretreatment of Hog Wastewater, 412

Analytical Model of Dual-Media Biofilter for Removal of Organic Air Pollutants, 439

Benzene Removal by PAC in Jet Flocculation System, 486

Determination of Transfer Rate Constants and Partition Coefficients for Air Phase Biofilters, 435

Equilibrium Model for Biodegradation and Adsorption of Mixtures in GAC Columns, 422

Expert System for Technology Screening for SOC and VOC Contaminated Water, 474

Modeling Effects of Moisture on Adsorption Capacity of Activated Carbon for VOCs, 418

Activated sludge

Continuous Classification of Moisture Content in Waste Activated Sludges, 395

Control of External Carbon Addition to Predenitrifying Systems, 495

Environmental Impacts of Nutrient Removal Processes: Case Study, 370

Feasibility Study on Freeze/Thaw Conditioning of Pulp Mill Waste Activated Sludge, 93

Modeling Nutrient Dynamics in Sequencing Batch Reactor, 403

Multiresponse Parameter Estimation of SVOCs in Activated Sludge Process, 457

New Sensor Based on pH Effect of Denitrification Process, 471

Structure Compression in Cake Filtration, 407

Activated sludge process

Characterization of Exocellular Protein and Its Role in Bioflocculation, 423

Model of Bacterial-Supplement Kinetics, 462

Active control

Active Control Approach for Reducing Floor Vibrations, 1203

Gravity-Actuator System for Control of Civil Structures, 1032

Integrated Passive/Active Vibration Absorber for Multistory Buildings, 1085
Multiple Objective LQG Control of Wind-Excited Buildings, 1138
Optimal Control of Adaptive/Smart Bridge Structures, 1054
Optimal Structural Control via Training on Ensemble of Earthquakes, 346
Stability of Actively Controlled Structures with Actuator Saturation, 1086
Static Output Polynomial Control for Linear Structures, 289
Water Wave Control by a Pitching Plate, 309

Active earth pressure
Earth Pressures with Sloping Backfill, 549

Adaptive systems
Adaptive Control of Nonlinear Uncertain Dynamical Systems, 345
Optimal Control of Adaptive/Smart Bridge Structures, 1054
Optimal Topology/Actuator Placement Design of Structures Using SA, 29
Structural Evaluation of Maglev Guideway Concepts, 1262

Adhesive bonding
Modes of Byssal Failure in Forced Detachment of Zebra Mussels, 477
Shear Reinforcement of Wood Using FRP Materials, 961

Admixtures
Use of Set Accelerating Admixtures in Dry-Mix Shotcrete, 976

Adsorbents
Removal of Lead and Chromium by Activated Slag-A Blast-Furnace Waste, 421

Adsorption
Adsorption of Acenaphthene on Porous Organic Polymers, 465
Arsenic Removal from Drinking Water During Coagulation, 461
Benzene Removal by PAC in Jet Flocculation System, 486
Equilibrium Model for Biodegradation and Adsorption of Mixtures in GAC Columns, 422
Expert System for Technology Screening for SOC and VOC Contaminated Water, 474
Influence of Cations on Compressibility Behavior of a Marine Clay, 634
Modeling Effects of Moisture on Adsorption Capacity of Activated Carbon for VOCs, 418
Multiresponse Parameter Estimation of SVOCs in Activated Sludge Process, 457
Natural Organic Matter Sorption by Kaolinite: Modified Langmuir Isotherm, 507
Process Development for Removal of Substituted Phenol by Carbonaceous Adsorbent Obtained from Fertilizer Waste, 466
Removal of Lead and Chromium by Activated Slag-A Blast-Furnace Waste, 421
Theoretical and Experimental Study of Metal Capture During Incineration Process, 498

Advection
Advection Distance of Water Droplets in Strong Winds, 1393
Analytical Model of Two-Dimensional Dispersion in Laterally Nonuniform Axial Velocity Distributions, 737
Analytical Solutions for Advection and Advection-Diffusion Equations with Spatially Variable Coefficients, 661
Chaotic Advections for Stokes Flows in Circular Cavity, 306
Refined Numerical Scheme for Advective Transport in Diffusion Simulation, 649
Semi-Lagrangian Algorithm for Two-Dimensional Advection-Diffusion Equation on Curvilinear Coordinate Meshes, 685
Tidal Flow and Transport Modeling Using ULTIMATE QUICKEST Scheme, 678

Aeration
Cross-Flow Versus Counterflow Air-Stripping Towers, 445
Measurement of Effective Saturation Concentration for Gas Transfer, 655
Oxygen Transfer Similitude for Vented Hydroturbine, 700

Aerial photography
Mapping with a Differential, 1481

Aerobic treatment
Comparison between Anaerobic-Anoxic-Oxic and Anoxic-Oxic Systems for Coke Plant Wastewater Treatment, 470

Aerodynamics
Amplitude and Turbulence Effects on Bridge Flutter Derivatives, 1056

Aerosols
CMB Source Apportionment During REVEAL, 376

Affirmative action
Is It Sunset Time for Affirmative Action and Set-Aside Programs?, 1428

Africa
Sustainable Development, Botswana Style, 1509
Water Works, 1508

Age factors
Increase in Losses Coefficient with Age for Small Diameter Pipes, 664
Steel Reinforced Concrete Structures in 1995 Hyogoken-Nanbu Earthquake, 1144

Aggregates
Drainability Characteristics of Granular Pavement Base Material, 1291
Expanded Clay and Shale Aggregates for Leachate Collection Systems, 629
Frost Susceptibility of Crushed Glass Used as Construction Aggregate, 98
Micromechanical Simulation of Hot Mix Asphalt, 271
Sulfate Resistance of Concrete Pavers, 956

Aging
Aging Effects on Oil-Contaminated Kuwaiti Sand, 553
Increase in Losses Coefficient with Age for Small Diameter Pipes, 664

Microprestress-Solidification Theory for Concrete Creep I: Aging and Drying Effects, 348
Taking in the River, 1518

Agriculture
Decision Support Model for Irrigation Water Management, 839
Use of Rubber Dams for Flood Mitigation in Hong Kong, 835
Water Balance Model for Small-Scale Water Harvesting Systems, 841

Air entrainment
Observations on Flow in Vertical Dropshafts in Urban Drainage Systems, 424
Use of Set Accelerating Admixtures in Dry-Mix Shotcrete, 976

Air flow
Effects of Air Valves and Pipework on Water Hammer Pressures, 1252
Environmental Chamber for Investigation of Building Envelope Performance, 46
Impact of Changes to Building Airtightness on HVAC Costs, 54

Air pollution
Analytical Model of Dual-Media Biofilter for Removal of Organic Air Pollutants, 439
Characteristics of Airborne Volatile Aromatics in Tainan, Taiwan, 414
Filling Data Algorithms in Urban Air Pollution Monitoring Networks, 413
Modeling Biofiltration of VOC Mixtures under Steady-State Conditions, 438
Modeling Vertical Spread of Airborne Pollutants from Sources Near Ground Level—Comparison with Field Measurements, 510
Petroleum Environmental Research Forum Field Study on Biofilters for Control of Volatile Hydrocarbons, 432
Predicting Traffic-Generated Carbon Dioxide Concentrations in Sydney, 1283
Transient Behavior of Biofilters: Start-Up, Carbon Balances, and Interactions Between Pollutants, 433
Treatment of Methylethylketone in Air Stream by Biotrickling Filters, 434
Urban Airborne and Blood Lead Analyses Using Neural Networks, 1249
Ventilation of Industrial Process Drains: Mechanisms and Effects on VOC Emissions, 478

Air pollution control
Biofiltration: Fundamentals, Design and Operations Principles, and Applications of Biological APC Technology, 430
Membrane Bioreactor for Control of Volatile Organic Compound Emissions, 437
Treatment of Methylethylketone in Air Stream by Biotrickling Filters, 434

Air quality
CMB Source Apportionment During REVEAL, 376
Design of Air Diffusion Terminal Devices in Passenger Train Vehicle, 511

Air stripping
Cross-Flow Versus Counterflow Air-Stripping Towers, 445
Expert System for Technology Screening for SOC and VOC Contaminated Water, 474

Air supported structures
Air-Supported Structures, 1581

Air temperature
Computation of ETo under Nonideal Conditions, 881
Self-Calibrating Method for Estimating Solar Radiation from Air Temperature, 780

Air water interactions
Prediction of Effective Saturation Concentration at Spillway Plunge Pools, 746
Progress and Recent Developments in Storm Surge Modeling, 679

Aircraft
A Turnaround for Hangar Design, 1493

Airfields
Aircraft/Pavement Technology: In the Midst of Change, 1580
Smooth Take-Off, 1465

Airport construction
Denver Airport's Soft Landing, 1514

Airport control towers
LAX Now Towers in Style (Available only in Structural Engineering Special Issue), 1487

Airport design
Denver Airport's Soft Landing, 1514

Airport runways
Decision Framework for Pavement Friction Management of Airport Runways, 1296
Smooth Take-Off, 1465

Airport terminals
Infrastructure and Economic Development: Airport Capacity in Chicago Region, 2001–18, 814

Airports
Coping with Construction in Operational Airports: SFIA Case Study, 1295
Denver Airport's Soft Landing, 1514
ETA:1999, 1494
Infrastructure and Economic Development: Airport Capacity in Chicago Region, 2001–18, 814
Infrastructure Opportunities in Chile, 1480
Japan Studies Floating Airport (Available only in Structural Engineering Special Issue), 1488

Alabama
Bridge Deterioration Rates and Durability/Longevity Performance, 1434
Results of Bridge Durability/Longevity Survey, 1435

Alaska
Bringing Low Flow to Eskimos, 1564
Snowmelt Modeling at Small Alaskan Arctic Watershed, 801

Alcohols
Selected Factors Influencing GCL Hydraulic Conductivity, 593

Algae
Estimating Non-Point-Source Loads and Associated Water Quality Impacts, 1350
Water Quality Model for Mariculture Management, 503

Algorithms
Analytic Benchmark Solutions for Open-Channel Flows, 758
Distributed Neural Dynamics Algorithms for Optimization of Large Steel Structures, 1130
Effective Elastoplastic Algorithms for Ductile Matrix Composites, 242
Filling Data Algorithms in Urban Air Pollution Monitoring Networks, 413
Flexible Discretization Algorithm for Fixed-Grid MOC in Pipelines, 753
Genetic Algorithms for Least-Cost Design of Water Distribution Networks, 1322
Genetic Algorithms-Based Methodologies for Design Optimization of Trusses, 1070
Maintenance Strategy Optimization of Bridge Decks Using Genetic Algorithm, 1251
Microprestress-Solidification Theory for Concrete Creep. II: Algorithm and Verification, 349
Parameter Estimation of Nonlinear Muskingum Models Using Genetic Algorithm, 660
Scheduling Logistic Support, 1441
Self-Organizing Neural Network for Identification of Natural Modes, 107
Semi-Lagrangian Algorithm for Two-Dimensional Advection-Diffusion Equation on Curvilinear Coordinate Meshes, 685
Structural Optimization by Genetic Algorithms with Tournament Selection, 120
Water Network Rehabilitation with Structured Messy Genetic Algorithm, 1330

Alignment
Core-Based SCB Fracture of Aligned First Year Sea Ice (Phase VI), 82
Core-Based SCB Fracture of Aligned First-Year Sea Ice (Phases III and IV), 81
Design Considerations for Combined Highway Alignments, 1248

Alkalinity
Dehalogenation of Chlorinated Organic Compounds by Strong Alkalis, 482

Allowable stress design
Design of Hydraulic Steel Structures, 1599
Effective Length and Notional Load Approaches for Assessing Frame Stability: Implications for American Steel Design, 1602

Alluvial channels
Effect of Channel Adjustment Processes on Reliability of Bridge Foundations, 713
Equilibrium Clear-Water Scour Around an Abutment, 673
Flow Resistance in Ice-Covered Alluvial Channels, 706
Quasi–Two-Dimensional Simulation of Scour and Deposition in Alluvial Channels, 707
Stable Width of an Alluvial Channel, 833
Turbulence Model for Water Flow over Two-Dimensional Bed Forms, 686

Alluvial streams
Coupled Modeling of Alluvial Flows, 690

Aluminum
Low-Cost Polymeric Aluminum Coagulant, 468
Saving Face, 1491

Alums
Arsenic Removal from Drinking Water During Coagulation, 461

Ambient air quality
Characteristics of Airborne Volatile Aromatics in Tainan, Taiwan, 414

Ammonia
Water Quality in Milwaukee, Wisconsin, Versus Intake Crib Location, 425

Anaerobic digestion
High-Solids Anaerobic Digestion of Mixed Municipal and Industrial Waste, 496

Anaerobic processes
Anaerobic Biogranulation as Microbial Response to Substrate Adequacy, 485
Anaerobic Fluidized Bed Pretreatment of Hog Wastewater, 412
Comparison between Anaerobic-Anoxic-Oxic and Anoxic-Oxic Systems for Coke Plant Wastewater Treatment, 470
Dynamic Model for UASB Reactor Including Reactor Hydraulics, Reaction, and Diffusion, 394
Effect of Sulfate on Anaerobic Degradation of Benzoate in UASB Reactors, 404
Effects of Molybdate on Sulfate Reduction and Benzoate Degradation, 479
Sulfate-Reducing Bacteria in Anaerobic Propionate Systems, 446
Treatment of Phthalic Waste by Anaerobic Hybrid Reactor, 497
Use of UASB Technology to Treat Crab Processing Wastewaters, 458

Analysis
Analysis of Crosstie Track in Lateral Plane Using New Track Equations, 1268
Analysis of Hysteretic Damping Using Analytic Signals, 300
Analysis of Thin-Steel-Plate Shear Walls, 1202
Analytical Dissolved Oxygen Model for Sinusoidally Varying BOD, 798
Analytical Solutions for Advection and Advection-Diffusion Equations with Spatially Variable Coefficients, 661
Inelastic Analysis and Design: Frames with Members in Minor-Axis Bending, 1046
Localization of Mono- and Multichannel Waves in Disordered Periodic Systems, 313
Natural Periods of Long-Span Cable-Stayed Bridges, 69
Response of Unconfined Aquifer to Sudden Change in Boundary Head, 829
Second-Order Analysis of Slender Steel Frames under Distributed Axial and Member Loads, 1167
Semianalytical Solution of Rectangular Plates, 292
Steady-State Local-Scale Analysis of Surface Flows over Rill-Interrill Areas, 716
Viscoelastic Timoshenko Beam Solutions from Euler-Bernoulli Solutions, 301

Analytical techniques
Analysis of Alternatives for Computing Backwater at Bridges, 730
Analytical Solutions of One-Line Model for Shoreline Change near Coastal Structures, 1378

On Lateral Earth Pressure Problem of Cohesive Backfill with Inclined Surface, 532

Anchor bolts

Mixed-Mode Fracture and Anchor Bolts in Concrete Analysis with Inner Softening Bands, 330

Wind Loads and Anchor Bolt Design for Petrochemical Facilities, 1656

Anchorages

Finite Element for Anchored Bars under Cyclic Load Reversals, 1099

Stabilization of Coastal Slopes by Anchored Geosynthetic Systems, 599

Anchors

Load-Displacement Prediction for Horizontally-Loaded Vertical Plates, 528

Anemometers

Oblique and Vertical Jet Dispersion in Channels, 692

Angle section

Design of Single and Multiple Angle Columns and Beams, 1126

Anisotropic materials

Using Modal Analysis for Estimation of Anisotropic Material Constants, 238

Anisotropic plates

Thermoelastic Analysis of Polar-Anisotropic Circular Plates, 339

Anisotropic soils

Soil Response in Cross-Anisotropic Seabed due to Standing Waves, 521

Anisotropy

Acoustic Emission and Anisotropic Expansion when Heating Marble, 986

Anisotropic Elastic Moduli of Granular Assemblies from Micromechanical Approach, 361

Anisotropic Vertex Plasticity Formulation for Concrete in-Plane Stress, 297

Dynamic Response of Plane Anisotropic Beams with Shear Deformation, 359

Limit Stress for Granular Composites Reinforced with Continuous Filaments, 316

Antarctic

Evaluation of Bioremediation in Cold Regions, 91

Application methods

Irrigation Performance Measures: Efficiency and Uniformity, 885

Approximation

Asymptotic Expansions for Reliability and Moments of Uncertain Systems, 353

Cosine Functions of GPS Carrier Phases for Parameter Estimation, 1235

Effective Move Limits for Approximate Structural Optimization, 1053

Oblique Wave Diffraction by Parallel Thin Vertical Barriers with Gaps, 1376

Response of Unconfined Aquifer to Sudden Change in Boundary Head, 829

Approximation methods

Approximate Analysis of Irregular Slab-on-Girder Bridges, 58

Aquatic environment

Effects of Watershed Development and Management on Aquatic Ecosystems, 1603

Predicting Microbial Toxicity of Nonuniform Multicomponent Mixtures of Organic Chemicals, 405

Waterpower '97, 1655

Aqueducts

Water-Worshipers of Nemausus, 1020

Aquifers

Analysis of One-Dimensional Ground-Water Flow in a Nonuniform Aquifer, 725

Estimation of Spatially Variable Aquifer Hydraulic Properties Using Kalman Filtering, 756

Ground Water: Protection Alternatives and Strategies in the U.S.A., 1615

Implementing Intrawell, Intercell Flow into Finite-Difference Ground-Water Flow Model, 787

Newport News: Brackish Water Gets Fresh, 1519

Non-Fickian Transport in Heterogeneous Saturated Porous Media, 221

Optimal Ground-Water Pollution Plume Containment with Fixed Charges, 1315

Response of Unconfined Aquifer to Sudden Change in Boundary Head, 829

Septic Tank–Soakpit Systems in Dar es Salaam, Tanzania, 378

Stratified Flow Approximation for Sloping Aquifers, 779

Time-Dependent Dispersion of Nonergodic Plumes in Two-Dimensional Heterogeneous Aquifers, 784

Aramid

Prestressed Glued-Laminated Timber Beam—Pilot Study, 129

Arbitration

Alternative Dispute Resolution in Government, 930

Arches

Chaotic Dynamics of Shallow Arch Structures under 1:2 Resonance, 285

Chaotic Motion of Shallow Arch Structures under 1:1 Internal Resonance, 286

Modern Formulation for Preelastic Theories on Masonry Arches, 236

Nonlinear Analysis of Beams and Arches Undergoing Large Rotations, 259

Arching

Full Use of Arching in Deck Slabs (Available only in Structural Engineering Special Issue), 1513

Architect/engineers

The Architect/Engineer's Role in Rehabilitation Work, 145

Architectural engineering

Architectural Engineering Program At King Fahd University of Petroleum and Minerals, 47

Architecture

Aesthetics and Philosophy in Bridge Design in Japan, 41

LAX Now Towers in Style (Available only in Structural Engineering Special Issue), 1487

Arctic regions

Evaluation of Bioremediation in Cold Regions, 91

Snowmelt Modeling at Small Alaskan Arctic Watershed, 801

Arizona

Waste Not: The Scottsdale Transfer Station (Available only in Structural Engineering Special Issue), 1544

Aromatic hydrocarbons

Adsorption of Acenaphthene on Porous Organic Polymers, 465

Characteristics of Airborne Volatile Aromatics in Tainan, Taiwan, 414

Cosolvent Effects of Oxygenated Fuels on PAH Solubility, 408

Ground Rubber: Sorption Media for Ground Water Containing Benzene and O-Xylene, 557

Predictive Model for Toluene Degradation and Microbial Phenotypic Profiles in Flat Plate Vapor Phase Bioreactor, 436

Arsenic

Arsenic Removal During Precipitative Softening, 420

Arsenic Removal from Drinking Water During Coagulation, 461

Arterial highways

Frequency of Probe Reports and Variance of Travel Time Estimates, 1279

Artificial intelligence

Artificial Neural Network Model for Subsurface-Drained Farmlands, 867

Artificial Neural Networks for Civil Engineers: Fundamentals and Applications, 1582

Boiler Erection Scheduling Using Product Models and Case-Based Reasoning, 191

Case-Based Approach for Steel Bridge Fabrication Errors, 108

Expert Systems for Civil Engineers: Integration Issues, 1608

Intelligent Civil Engineering Materials and Structures, 1628

Linguistic Approach to Geometric Modeling of Hierarchical Systems, 116

Net Results, 1452

Artificial islands

Interaction Between Solitary Wave and Floating Elastic Plate, 1363

Artificial recharge

Ground Water Mound Equation for Rectangular Recharge Area, 856

ASCE Activities

ASCE, Whither Goest Thou? I: History, 1024

Who is the Civil Engineering Reader?, 1453

ASCE Awards & Prizes

Are Contract Disputes Predictable?, 12

Behavior of RC Bridge Decks with Flexible Girders, 1

Calibration of LRFD Bridge Code, 8

Denver Airport's Soft Landing, 1514

Effect of Lime-Stabilized Sludge as Landfill Cover on Refuse Decomposition, 10

Engineering and Construction Management: Leadership and Opportunity, 183

Ground Movement Prediction for Deep Excavations in Soft Clay, 11

Is No-Tension Design of Concrete or Rock Structures Always Safe?—Fracture Analysis, 6

Management of Water Treatment Plant Residuals, 2

ASCE Student Chapters

A Race to Innovate, 1448

Asphalt cement

Effects of Thermoplastic Block Copolymers on Rheology of Asphalt, 967

Micromechanical Simulation of Hot Mix Asphalt, 271

Asphaltic concrete

Evaluation of Crack Propagation Properties of Asphalt Mixtures, 1294

Highway Specifications - Quality vs Pay, 202

Program BIMODPAV for Analysis of Flexible Pavements, 1246

Rate Sensitivity of Asphalt Concrete in Triaxial Compression, 963

Rut Susceptibility of Large Stone Mixtures, 1247

Viscoelastic Analysis of Diametral Compression of Asphalt Concrete, 283

Viscoelastic Behavior of Asphalt Concrete in Diametral Compression, 1305

Asphalts
Thin Film Deformation Behavior of Power-Law Creeping Materials, 343
Use of Pyrolyzed Carbon Black as Additive in Hot Mix Asphalt, 1304
Wind Uplift Model for Asphalt Shingles, 52

Assessments
Debris-Flow Hazards Mitigation: Mechanics, Prediction, and Assessment, 1595

Assimilation
Columnar Biological Treatability of AOC under Oligotrophic Conditions, 400

Astronomy
Jobsite Azimuths Made Easy with Mica, 1227

Asymmetric structures
Seismic Response of Asymmetric Systems: Energy-Based Approach, 1197

Audits
Construction Quality Auditing, 941

Australia
Five Years of Australian Limit States Steel Design, 1013
Improving Watershed Management Using an Innovative Integrated Resources Management Approach in Australia, 1016
Intertidal Motions within Deep Basin of Swan River Estuary, 738
Predicting Traffic-Generated Carbon Dioxide Concentrations in Sydney, 1283

Automated transit vehicles
Dynamic Route Choice Model of Large-Scale Traffic Network, 1277
Simulation Laboratory for Evaluating Dynamic Traffic Management Systems, 1278

Automatic identification systems
Operational Benefits of Electronic Toll Collection: Case Study, 1301

Automation
Automated Approach to Negotiation of BOT Contracts, 112
Automated Monitoring at Tolt Dam, 1470
Automated People Mover Standards—Part 1, 1584
COCSY II: CAD/CAM Integration for On-Site Robotics, 100
Comparison and Calibration of Canal Gate Automation Algorithms, 858
Construction Congress V: Managing Engineered Construction in Expanding Global Markets, 1593
Efficient Valve Representation in Fixed-Grid Characteristics Method, 721
Facilities Computerized Maintenance Management Systems, 49
Idealized Automated Control of Sloping Canals, 865
Intelligent Technology for Truck Crane Accident Prevention, 181
On-Line Assistance for Crane Operators, 127
Operational Benefits of Electronic Toll Collection: Case Study, 1301
Optimal Design for Automatic Control of On-Demand Canal Systems, 810
Optimal Nonlinear Predictive Control for Canal Operations, 832
Pipeline Research Needs, 1638
State of Art in Automation of Earthmoving, 35

Automobile usage
Dynamic Ride-Sharing: Theory and Practice, 1281

Auto-regressive moving-average model
Predicting Caspian Sea Surface Water Level by ANN and ARIMA Models, 1375

Axial compression
Short-Term Behavior and Design of Fiber Reinforced Polymeric Slender Members under Axial Compression, 141
Stability of Steel Columns in Case of Fire: Numerical Modeling, 1110
Thermomechanical Postbuckling of Stiffened Laminated Cylindrical Shell, 263

Axial forces
Performance of Scaffold Frame Shoring under Pattern Loads and Load Paths, 164

Axial loads
Comparative Study of Two Semicontinuous Models for Wire Strand Analysis, 308
Elastic Stability of Beam-Columns with Flexural Connections under Various Conservative End Axial Forces, 1168
Elasticity Solutions for Hertzian Loaded Composite Sandwich Plates, 17
First- and Second-Order Stiffness Matrices and Load Vector of Beam-Columns with Semirigid Connections, 1105
Instability Analysis of Normal- and High-Strength Reinforced-Concrete Walls, 1106
Second-Order Analysis of Slender Steel Frames under Distributed Axial and Member Loads, 1167
Serviceability Analysis of Concrete Sections under Biaxial Bending, 1041
Strength of Multiplanar Tubular KK-Joints under Antisymmetrical Axial Loading, 1115

Axial strain
Parametric Identification of Truss Structures Using Static Strains, 1136

Axisymmetry
Analysis of Moderately Thick Circular Plates Using Differential Quadrature Method, 356
Axisymmetric Guided Waves in Jointed Laminated Cylinders, 329

Azimuth
Jobsite Azimuths Made Easy with Mica, 1227
Three-Dimensional Azimuth of a GPS Vector, 1237

Backfills
Behavior of Gravity Caisson on Sand, 542
Earth Pressures with Sloping Backfill, 549
Load Transfer Analysis of Buried Pipe in Different Backfills, 1298
On Lateral Earth Pressure Problem of Cohesive Backfill with Inclined Surface, 532

Backhoes
CAD-Integrated Excavation and Pipe Laying, 188

Backwashing
Evaluation of Trickle Bed Air Biofilter Performance for BTEX Removal, 429

Backwater
Analysis of Alternatives for Computing Backwater at Bridges, 730
Subcritical Junction Flow, 691

Bacteria
Bacterial Impacts of Ocean Outfalls: Legal Challenges, 388
Chromium(VI) Reduction by *Pseudomonas fluorescens* LB300 in Fixed-Film Bioreactor, 456
Model of Bacterial-Supplement Kinetics, 462
Sulfate-Reducing Bacteria in Anaerobic Propionate Systems, 446

Banding
Undrained Shear Band Deformation in Granular Media, 281

Bank stabilization
Riverbank Stabilization Program, 1348
Stable Channels with Mobile Bed: Formulation and Numerical Solution, 668

Barges
Impact of Barge Traffic on Stream Reaeration: Laboratory Experiments, 452

Barriers
Capillary Barriers and Subtitle D Covers: Estimating Equivalency, 366
Enhanced TEX Biodegradation in Nutrient Briquet-Peat Barrier System, 368
An Evaluation of Laboratory Test Results for the U.S. Gypsum Sight and Sound Screen System, 1607
Injection of Colloidal Fe^0 Particles in Sand with Shear-Thinning Fluids, 459
Laboratory and Field Hydraulic Conductivity of Three Compacted Paper Mill Sludges, 590
Oblique Wave Diffraction by Parallel Thin Vertical Barriers with Gaps, 1376
Wonderwall, 1568
Zero-Valent Iron Colloid Emplacement in Sand Columns, 426

Base isolation
Analytical Modeling of High Damping Rubber Bearings, 1149
Method for Seismic Base Isolation of Liquid-Storage Tanks, 1040
Nonlinear Control of Structures in Earthquakes, 337

Basins
Hydrodynamic Modeling of Basin Irrigation, 883
Intertidal Motions within Deep Basin of Swan River Estuary, 738

Bayesian analysis
Bayesian Benefit-Risk Analysis for Sustainable Process Design, 375
Rational Approach to Comparison of Flood Distributions by Simulation, 785

Bays
Effect of Wave-Enhanced Bottom Friction on Storm-Driven Circulation in Massachusetts, 1384

Beach erosion
Problems in Characterizing Dynamics of Mud Shore Profiles, 682

Beaches
Bacterial Impacts of Ocean Outfalls: Legal Challenges, 388
Cross-Shore Variation of Wave Reflection from Beaches, 1390
Determination of Sedimentary Source in the Port of Hashidate by Using Geochemical Elements, 1362

Beam columns
Analytical Modeling of Dual Panel Zone in Haunch Repaired Steel MRFs, 1030
A Cyclic Nonlinear Model for Concrete-Filled Tubes. I: Formulation, 1113
A Cyclic Nonlinear Model for Concrete-Filled Tubes. II: Verification, 1114
Design of Beam-Columns in Steel Frames. I: Study of Philosophies and Procedures, 1210
Design of Beam-Columns in Steel Frames. II: Comparison of Standards, 1211
Elastic Stability of Beam-Columns with Flexural Connections under Various Conservative End Axial Forces, 1168
First- and Second-Order Stiffness Matrices and Load Vector of Beam-Columns with Semirigid Connections, 1105
Member Stiffness for Three-Dimensional Beam-Columns, 1142
Upgrading of Nonductile Reinforced Concrete Frame Connections, 1146

Beams
Advanced Connection Techniques for Cold-Formed Steel Structures, 1044
Approximate Analysis of Irregular Slab-on-Girder Bridges, 58
Behavior of Fiber-Reinforced Concrete Beams under Cyclic Loading, 1104

Discharge Ratios in Smooth and Rough Compound Channels, 667
Economical Control of Discharges from Petroleum Tank Farms, 1423
Hysteresis Sensitive Neural Network for Modeling Rating Curves, 122
Indirect Velocity Measurement from Standing Waves in Rockbed Rivers, 744
Particle Tracking Simulation of Pollutant Discharges, 475
Potential Effects of Translatory Waves on Estimation of Peak Flows, 705
Side Weir in U-Shaped Channels, 712

Discharge coefficients
Analysis of Flow through Lateral Slot, 882

Discharge measurement
Discharge Measurement in Circular Sewer, 843
Mobile Flume for Pipe Flow, 828

Discrete elements
Effect of Discrete Member Size on Reliability of Wood Beams, 1124
Micromechanical Simulation of Hot Mix Asphalt, 271
Optimal Design of Trusses Using Available Sections, 1107

Discrimination
Women in Engineering: Toward Barrier-Free Work Environment, 891

Disinfectants
Inverse Modeling of Chlorine Concentration in Pipe Networks under Dynamic Condition, 489

Disinfection
Continuous Flow Residence Time Distribution Function Characterization, 379
Estimating Effective Germicidal Dose from Medium Pressure UV Lamps, 504
Modeling Chlorine Inactivation Requirements of *Cryptosporidium Parvum* Oocysts, 469

Dispersion
Analysis of Fine-Grained Sediment Movement in Small Canals, 669
Analytical Model of Two-Dimensional Dispersion in Laterally Nonuniform Axial Velocity Distributions, 737
Dispersion Effects on Longshore Currents in Surf Zones, 1385
Dispersion of Variable-Density Contaminant in Vertical Plume, 794
Injection Mode Effects on Tracer Experiments in Columns, 788
Linear Finite-Element Modeling of Contaminant Transport in Ground Water, 501
Oblique and Vertical Jet Dispersion in Channels, 692
Particle Tracking Simulation of Pollutant Discharges, 475
Predicting Traveltime and Dispersion in Rivers and Streams, 749
Stochastic Theory for Irregular Stream Modeling. II: Solute Transport, 708
Stream Velocity Profiles and Longitudinal Dispersion, 734
Tidal Characteristics of Suspended Sediment Concentrations, 681
Tidal Flow and Transport Modeling Using ULTIMATE QUICKEST Scheme, 678
Time-Dependent Dispersion of Nonergodic Plumes in Two-Dimensional Heterogeneous Aquifers, 784

Displacement
Dynamic Behavior of Metal-Plate-Connected Wood Truss Joints, 1150
Elastic and Inelastic Buckling Analysis of Thin-Walled Tapered Members, 298
Load-Displacement Prediction for Horizontally-Loaded Vertical Plates, 528
New Definition of Conservative Internal Moments in Space Frames, 224
Optimal Design of Trusses Using Available Sections, 1107
Program BIMODPAV for Analysis of Flexible Pavements, 1246
Seismic Stability and Permanent Displacement of Landfill Cover Systems, 533
Thermoelastic Analysis of Polar-Anisotropic Circular Plates, 339

Displacements
Behavior of Gravity Caisson on Sand, 542
Experimental and Analytical Study of Dynamic Behavior of a Bridge, 1204
Field Performance of Nailed Soil Wall in Residual Soil, 995
Modified Newmark Model for Seismic Displacements of Compliant Slopes, 588
Performance of Excavations for Depressed Expressway in Singapore, 586

Disposal
The Right Tooele for the Job, 1559

Dispute resolution
Alternative Dispute Resolution in Government, 930
Building Sustainable Public Policy Decisions Through Partnerships, 914
Defusing Delay Claims, 1476
Engineering Leadership in Public Policy Resolution, 927

Dissipation
Hysteretic Behavior Characterization of Friction-Damped Braced Frames, 1148

Dissolved oxygen
Analytical Dissolved Oxygen Model for Sinusoidally Varying BOD, 798
Impact of Barge Traffic on Stream Reaeration: Laboratory Experiments, 452
Measurement of Effective Saturation Concentration for Gas Transfer, 655
Modeling CSO Impacts from Nashville Using EPA's Demonstration Approach, 381
Water Quality Model for Mariculture Management, 503

Distortion
Generalized Elastic Buckling of Restrained I-beams by FEM, 1218
Lateral-Distortional Buckling of Hollow Flange Beams, 1108

Distributed processing
Distributed Neural Dynamics Algorithms for Optimization of Large Steel Structures, 1130
Simulation Laboratory for Evaluating Dynamic Traffic Management Systems, 1278

Distribution
Continuous Flow Residence Time Distribution Function Characterization, 379
Green and Ampt Infiltration with Redistribution, 880

Distribution patterns
Estimation of Global Irrigation Distribution Uniformity, 887
Irrigation Performance Measures: Efficiency and Uniformity, 885

Disturbances
Coping with Construction in Operational Airports: SFIA Case Study, 1295
Numerical Simulation of Freeway Traffic Flow, 1306

Diversion
Analysis of Flow through Lateral Slot, 882
Unsaturated Drainage Layers for Diversion of Infiltrating Water, 877

Documentation
Documenting Defensively, 940
Using Parameter Dependency Network to Represent Design Rationale, 110

Domes, structural

Hydrologic Modeling of a Complex Wetland, 875
Mechanical Behavior of Interconnected Concrete-Block Retaining Wall, 543
Modeling Flow and Transport in Drainage Areas with Shallow Ground Water, 852
Seepage from Canals with Infiltration from Free Surface Zone, 863
Unsaturated Drainage Layers for Diversion of Infiltrating Water, 877

Drainage systems
Field Strategy for Agricultural Drainage and Water-Quality Management, 831
Observations on Flow in Vertical Dropshafts in Urban Drainage Systems, 424
Water Quality as Design Criterion in Drainage Water Management Systems, 846

Drains
Comparative Field Performance of Subdrainage Systems, 853
Preloading at the South end of Confignon Tunnel, 560
Ventilation of Industrial Process Drains: Mechanisms and Effects on VOC Emissions, 478

Drawdown
Extreme Hydraulic Gradient Statistics in Stochastic Earth Dam, 625

Drawings
Shop Drawing Process of Stone Veneered Cladding Systems, 43

Dredge spoil
Dredging and Management of Dredged Material, 1601

Dredges
Dredging and Management of Dredged Material, 1601

Dredging
Dredging and Management of Dredged Material, 1601
Dredging Up Toxic Sediments, 1474

Drift
Drift Spectrum: Measure of Demand for Earthquake Ground Motions, 1074
Learning from Recorded Earthquake Motion of Buildings, 1034

Drilled shafts
Design Method for Drilled Shafts in Soft Argillaceous Rock, 551
Side Load-Transfer Mechanisms in Drilled Shafts in Soft Argillaceous Rock, 537

Drilling
Analysis of Stress-Change Disturbance Caused by Ideal Drilling in Clay, 587
Delivered into Providence, 1462
Grouting Pains (Available in Geoenvironmental Engineering Special Issue), 1556

Driven piles
Group Effect on Driven Piles under Lateral Load, 595
Probability Method Applied to Dynamic Pile-Driving Control, 536

Driver behavior
Disaggregate Gap-Acceptance Model for Unsignalized T-Intersections, 1245

Drop structures
Observations on Flow in Vertical Dropshafts in Urban Drainage Systems, 424
Predicting Oxygen Uptake and VOC Emissions at Enclosed Drop Structures, 372

Droughts
California's 1995 Water Bank Program: Purchasing Water Supply Options, 1321
Managing Water: Coping with Scarcity and Abundance, 1633
Salinity Control in Mississippi River Under Drought Flows, 1361

Ductility
Cable Safety Factors for Four Suspension Bridges, 75
Ductile Crack as Trigger of Brittle Fracture in Steel, 1112
Ductility of G550 Sheet Steels in Tension, 1213
Effect of Severe Corrosion on Cyclic Ductility of Steel, 1201
Effective Elastoplastic Algorithms for Ductile Matrix Composites, 242
Putting the Wraps on Quakes, 1521
Seismic Retrofit of RC Circular Columns Using Prefabricated Composite Jacketing, 1187
Strength and Ductility Simulation of High-Strength Concrete Columns, 1188
Stress-Strain Relationship of Confined High-Strength Plain and Fiber Concrete, 975
Transition between Fatigue and Ductile Fracture in Steel, 1128

Dunes
Weakly Nonlinear Stability Analysis for Dune Formation, 750

Durability
Absorption and Sorptivity of Cover Concrete, 966
Bridge Deterioration Rates and Durability/Longevity Performance, 1434
DOT Management Actions to Enhance Bridge Durability/Longevity, 1437
Durability Performances of Alabama Bridge Components and Subcomponents, 1440
Results of Bridge Durability/Longevity Survey, 1435
Structural Design Actions to Mitigate Bridge Deck Cracking, 1436
Structural Evaluation of Maglev Guideway Concepts, 1262
Sulfate Resistance of Concrete Pavers, 956
Testing Methods to Determine Properties of Fiber Reinforced Plastic Panels Used for Reinforcing Glulams, 143
Use of Set Accelerating Admixtures in Dry-Mix Shotcrete, 976

Dust
Dusting Procedures for Advance Ice-Jam Mitigation Measures, 86
Relative Effectiveness of Road Dust Suppressants, 1292

Dye studies
Cooling Lake Simulations Compared to Thermal Imagery and Dye Tracers, 740

Dyes
Computation of Dye Concentration in Shallow Recirculating Flow, 731

Dynamic analysis
Bridge Progressive Collapse Vulnerability, 1055
Seismic and Dynamic Analysis and Design Considerations for High Level Nuclear Waste Repositories, 1644
SPT Dynamic Analysis and Measurements, 618
Vehicle-Bridge Interaction Element for Dynamic Analysis, 1205
Vibrational Behavior of Continuous Span Highway Bridge—Influencing Variables, 1068

Dynamic characteristics
Dynamic Behavior of Metal-Plate-Connected Wood Truss Joints, 1150

Dynamic loads
Discrete and Continuous Models for Dry Masonry Columns, 260
Dynamic Analysis of a Propagating Antiplane Interface Crack, 307
Linear and Nonlinear Analysis of Complex Structures Via Individual Components, 34
Nonlinear Dynamic Analysis of Steel Frames by Modal Superposition, 1206
Optimal Control of Adaptive/Smart Bridge Structures, 1054
Pavement Analysis for Moving Aircraft Load, 1297
Probability Method Applied to Dynamic Pile-Driving Control, 536
Propagation of Explosive Pulses in Assemblies of Disks and Spheres, 333
Seismic Analysis and Design for Soil-Pile-Structure Interactions, 1643
Spectator Live Loads During Football Games, 1209

Dynamic models
Dynamic Model for Soluble Mn^{2+} Removal by Oxide-Coated Filter Media, 443
Dynamic Model for UASB Reactor Including Reactor Hydraulics, Reaction, and Diffusion, 394
Dynamic Route Choice Model of Large-Scale Traffic Network, 1277
General Outlook of Pavement and Vehicle Dynamics, 1307
Modeling Nutrient Dynamics in Sequencing Batch Reactor, 403
State of Art in Automation of Earthmoving, 35

Dynamic programming
Multiobjective Analysis of Service-Water-Transmission Systems, 1323
Multiobjective Watershed-Level Planning of Storm-Water Detention Systems, 1353
Optimal Stochastic Multicrop Seasonal and Intraseasonal Irrigation Control, 1319
Planning Reservoir Operations with Imprecise Objectives, 1332
Value of Seasonal Flow Forecasts in Bayesian Stochastic Programming, 1352

Dynamic properties
Low Strain Shear Moduli of Cemented Sands, 579

Dynamic response
Deflection Response Models for Cracked Rigid Pavements, 1290
Dynamic Response of Cantilever Retaining Walls, 539
Dynamic Response of Laterally Excited Pile Groups, 520
Dynamic Response of Plane Anisotropic Beams with Shear Deformation, 359
Dynamic Response of Railway Tracks to Oscillatory Moving Masses, 303
Dynamic Vertical Response of Piles in Nonlinear Soil, 596
Mechanics and Dynamics of Intelligent Passive Vibration Control System, 250
Method of Reliability-Based Seismic Design. I: Equivalent Nonlinear Systems, 1058
Method of Reliability-Based Seismic Design. II: Calibration of Code Parameters, 1059
Modeling of Masonry Infill Panels for Structural Analysis, 1180
Random Vibration of Systems with Frequency-Dependent Parameters or Fractional Derivatives, 246
Response of Earth Dams to Rayleigh Waves Using Coupled FE-BE Method, 364
Response of Elastic Continuum Carrying Moving Linear Oscillator, 319
Response of Plate and Shell Structures due to Low Velocity Impact, 354
Static Output Polynomial Control for Linear Structures, 289
System Identification with Limited Observations and without Input, 272
Vibrational Behavior of Continuous Span Highway Bridge—Influencing Variables, 1068

Dynamic structural analysis
Effects of Porous Sediments on Seismic Response of Concrete Gravity Dams, 248

Dynamic tests
Determination of *E*-Modulus of Young Concrete with Nondestructive Method, 953
Large-Scale Seismic Testing of Knee-Brace-Frame, 1029
Time-Frequency and Ambiguity Function Approaches in Structural Identification, 358

Dynamics
Adaptive Control of Nonlinear Uncertain Dynamical Systems, 345
Analysis of Class of Nonlinear System under Deterministic and Stochastic Excitations, 33
Chaotic Dynamics of Shallow Arch Structures under 1:2 Resonance, 285
Chaotic Motion of Shallow Arch Structures under 1:1 Internal Resonance, 286
Correlation of Seismic Responses of Structures, 1075
Dynamic Optimal Ground-Water Reclamation with Treatment Capital Costs, 1317
Effects of Thermoplastic Block Copolymers on Rheology of Asphalt, 967
Experimental and Analytical Study of Dynamic Behavior of a Bridge, 1204
Hybrid Inverse Mode Problem for Structure-Foundation Systems, 249
Interpretation of Large-Strain Seismic Cross-Hole Tests, 562
Mechanics and Dynamics of Intelligent Passive Vibration Control System, 250
Multiple Objective LQG Control of Wind-Excited Buildings, 1138
Natural Periods of Long-Span Cable-Stayed Bridges, 69
Observation and Modeling in Numerical Analysis and Model Tests in Dynamic Soil-Structure Interaction Problems, 1637
Random Vibration of Systems with Frequency-Dependent Parameters or Fractional Derivatives, 246
Response Cumulant Equations for Dynamic Systems under Delta-Correlated Processes, 232
Spectator Live Loads During Football Games, 1209
Wave Propagation in Granular Rod Using High-Gradient Theory, 219

Earth pressure
Earth Pressures with Sloping Backfill, 549
Field Behavior of Excavation Stabilized by Deep Soil Mixing, 576
Lateral Stress Effects on CPT Liquefaction Resistance Correlations, 598
On Lateral Earth Pressure Problem of Cohesive Backfill with Inclined Surface, 532
Performance of Excavations for Depressed Expressway in Singapore, 586
Rational Equipment Selection Method Based on Soil Conditions, 157
Stability of Retaining Walls Against Overturning, 604
Variational Analysis of Earth Pressure on a Rigid Earth-Retaining Wall, 274

Fourier transform
Simulation of Multivariate Nonstationary Random Processes: Hybrid DFT and Digital Filtering Approach, 363

Fractal analysis
Size Dependence of Strength and Fracture Properties of Brick Masonry Walls, 311

Fracture mechanics
Anisotropic Vertex Plasticity Formulation for Concrete in-Plane Stress, 297
Applicability of J-Integral to Tension-softening Materials, 275
Comparisons of Concrete Fracture Models, 235
Core-Based SCB Fracture of Aligned First Year Sea Ice (Phase VI), 82
Core-Based SCB Fracture of Aligned First-Year Sea Ice (Phases III and IV), 81
Evaluation of Crack Propagation Properties of Asphalt Mixtures, 1294
Evaluation of Rib/Skin Fracture in Composite Isogrid, 223
Fatigue Reliability Reassessment Procedures: State-of-the-Art Paper, 1060
Fracture Parameters by Polylinear Tension-Softening Analysis, 264
Fracturing Truss Model: Size Effect in Shear Failure of Reinforced Concrete, 360
Is No-Tension Design of Concrete or Rock Structures Always Safe?—Fracture Analysis, 6
LEFM Applications to Concrete Gravity Dams, 310
Mixed-Mode Fracture and Anchor Bolts in Concrete Analysis with Inner Softening Bands, 330
Prediction of Cracking Response of Reinforced Concrete Tensile Members, 1035
Reversal in Failure Scaling Transition of Fibrous Composites, 225
Size Effect in Compression Fracture: Splitting Crack Band Propagation, 231
Study of Rock Fracture by Permeability Method, 584
Theory of Crack Spacing in Concrete Pavements, 243

Fracture strength
Size Dependence of Strength and Fracture Properties of Brick Masonry Walls, 311
Study of Rock Fracture by Permeability Method, 584

Fractures
Normal/Shear Cracking Model: Application to Discrete Crack Analysis, 305
Shear Lag in Bolted Angle Tension Members, 1162
Simulation of NAPL Dissolution in Fractured Permeable Formation: Quasi-steady Behavior, 390
Stress-Separation Curves for Saline Ice Using Fictitious Crack Model, 318

Fracturing
Acoustic Emission and Anisotropic Expansion when Heating Marble, 936
Size Dependence of Strength and Fracture Properties of Brick Masonry Walls, 311

Frame design
Robert Maillart's Curved Concrete Arch Bridges, 1178

Framed structures
Braced for Failure (Available only in Structural Engineering Special Issue), 1512
A Cyclic Nonlinear Model for Concrete-Filled Tubes. I: Formulation, 1113
A Cyclic Nonlinear Model for Concrete-Filled Tubes. II: Verification, 1114
A Dual Answer to Seismic Stress (Available only in the Structural Engineering Special Issue), 1477
Effect of Soil Consolidation on Space Frame-Raft-Soil Interaction, 1207
Modeling of Masonry Infill Panels for Structural Analysis, 1180
Period Formulas for Moment-Resisting Frame Buildings, 1198
Reliability Assessment of Damaged RC Framed Structures, 1131
Seismic Response of Light-Frame Wood Buildings, 1200

Frames
Analytical and Numerical Solutions for Frames with Softening Hinges, 214
Appraisal of Partially Restrained Steel Columns in Nonsway Frames, 1129
Elastic Stability of Beam-Columns with Flexural Connections under Various Conservative End Axial Forces, 1168
Evaluation of Nonlinear Frame Finite-Element Models, 1140
Finite Element Modeling of Masonry-Infilled RC Frames, 1098
Hysteretic Behavior Characterization of Friction-Damped Braced Frames, 1148
Inelastic Buckling of Concrete Column in Braced Frame, 1101
Large-Scale Seismic Testing of Knee-Brace-Frame, 1029
Optimization of Reinforced Concrete Frames, 1051

Performance of Scaffold Frame Shoring under Pattern Loads and Load Paths, 164
Postcritical Imperfection-Sensitive Buckling and Optimal Bracing of Large Regular Frames, 1087
Second-Order Elastic Plane-Frame Analysis Using Finite-Element Method, 1172
Seismic Design of Eccentrically Braced Space Frame, 1143
Stability of Columns in Unbraced Frames, 1139
Story Stability of Braced, Partially Braced, and Unbraced Frames: Classical Approach, 1120
Uplift Capacity of Light-Frame Rafter to Top Plate Connections, 53

Framing
A Dual Answer to Seismic Stress (Available only in the Structural Engineering Special Issue), 1477
Precast Concrete Floor Framing Systems to Accommodate Nonstructural Requirements, 48

Free flow
Modeling Turbulence Mechanisms in Flows Over Abrupt Drops in Bed Elevation, 288
Three-Dimensional Computation of Flow Around Groyne, 748

Free surfaces
Modeling of Free Surface in Steady-State Radial Seepage, 778
Turbulence Model for Water Flow over Two-Dimensional Bed Forms, 686

Freeze-thaw cycle
Feasibility Study on Freeze/Thaw Conditioning of Pulp Mill Waste Activated Sludge, 93
Freeze-Thaw Cycling and Hydraulic Conductivity of Bentonitic Barriers, 547
Frost Susceptibility Properties of Soma-B Fly Ash, 205
Hydraulic Conductivity of Geosynthetic Clay Liners after Freeze-Thaw, 555
Infiltration Tests on Fractured Compacted Clay, 571

Freeze-thaw durability
Microstructural Features of Railseat Deterioration in Concrete Ties, 971

Freezing
Extreme-Value Statistics for Frost Penetration Depths in Northeastern United States, 609
Frost Susceptibility of Crushed Glass Used as Construction Aggregate, 98
Improved Thermal Computations for Artificially Frozen Shaft Excavations, 594
Innovative Design and Construction for Foundations and Substructures Subject to Freezing and Frost, 1627
Natural Sludge Dewatering. I: Combination of Natural Freezing, Thawing, and Drying as Methods, 79
Natural Sludge Dewatering. II: Thawing-Drying Process in Full-Scale Sludge Freezing Ditches, 80
Prediction of Pavement Response during Freezing and Thawing Using Finite Element Approach, 97

Freight transportation
Carrying Freight on High-Speed Rail Lines, 1267

Frequencies
Experimental and Analytical Study of Dynamic Behavior of a Bridge, 1204
Frictional Response of PTFE Sliding Bearings at High Frequencies, 73
Planar Free Vibrations of Off-Axis Piezoelectric Laminates, 284
Radio Frequency Plasma Treatment of Organic Hazardous Waste, 1414
Transient Impact Response of Bridge I-Girders with and without Flaws, 72

Frequency
Learning from Recorded Earthquake Motion of Buildings, 1034
Model for Recurrence Rate of Hurricanes in Gulf of Mexico, 1370
Random Vibration of Systems with Frequency-Dependent Parameters or Fractional Derivatives, 246

Frequency analysis
Bootstrap Position Analysis for Forecasting Low Flow Frequency, 1356
Regional Frequency Analysis of Wabash River Flood Data by L-Moments, 797
Reliability Analysis in Support of Risk Assessment for Hydroelectric Generating Stations, 1335

Frequency distribution
Determination of Watershed Curve Number Using Derived Distributions, 830
New Conversion Model for Areal Sampling of Fluvial Sediments, 768

Friction
Decision Framework for Pavement Friction Management of Airport Runways, 1296
Frictional Response of PTFE Sliding Bearings at High Frequencies, 73
Microstructural Features of Railseat Deterioration in Concrete Ties, 971
Modern Formulation for Preelastic Theories on Masonry Arches, 236
Numerical Model of Impact-Damped Continuous Systems, 258
Settlement of Reinforced Sand in Foundations, 608
Triaxial Determination of Shear Strength of Tire Chips, 573
Young's Modulus Interpreted from Compression Tests with End Friction, 213

Friction factor
Computation of Energy Dissipation in Transient Flow, 657
Effect of Shape on Uniform Flow in Smooth Rectangular Open Channels, 715

Friction piles
Buckling of Piles with General Power Distribution of Lateral Subgrade Reaction, 534

Frost heave
Frost Heave Loading of Constrained Footing by Centrifuge Modeling, 614

Frost penetration
Extreme-Value Statistics for Frost Penetration Depths in Northeastern United States, 609
Frost Susceptibility of Crushed Glass Used as Construction Aggregate, 98

Froude number
Maximum Vertical Penetration of Plane Turbulent Negatively Buoyant Jets, 323

Frozen soils
Improved Thermal Computations for Artificially Frozen Shaft Excavations, 594

Fuels
Design of Free Product Recovery System for Jet Fuel, 1421

Full-scale tests
Active Control Approach for Reducing Floor Vibrations, 1203
Finite Element Analysis of Unstiffened Flush End-Plate Bolted Joints, 1216
Lateral-Load Response of Two Reinforced Concrete Bents, 1081
Natural Sludge Dewatering. I: Combination of Natural Freezing, Thawing, and Drying as Methods, 79
Natural Sludge Dewatering. II: Thawing-Drying Process in Full-Scale Sludge Freezing Ditches, 80
Performance of Scaffold Frame Shoring under Pattern Loads and Load Paths, 164
SALLOP: Simple Approach for Lateral Loads on Piles, 622
Use of Iron Salts to Control Dissolved Sulfide in Trunk Sewers, 13
Wind Uplift Model for Asphalt Shingles, 52

Functional analysis
Facility Management Value-Adding Functional Analysis Model, 55

Funding allocations
Forecasts of Funding Needs for Infrastructure Renewal, 823
Highway Maintenance Fund Allocation: Tabulated Manual Procedure, 1285

Furrow irrigation
Economic Optimization of Furrow Irrigation, 879
IPE: Model for Management and Control of Furrow Irrigation in Real Time, 864

Fuzzy sets
Alternative Modeling Framework for Pavement Serviceability Analysis, 1302
Development of Concrete Bridge Rating Prototype Expert System with Machine Learning, 126
A Fuzzy Set Based and Performance Oriented Pavement Network Optimization System, 821
Multiobjective Optimization Design with Pareto Genetic Algorithm, 1175
Planning Reservoir Operations with Imprecise Objectives, 1332
Variability in Perceived Satisfaction of Reservoir Management Objectives, 1331
Water Pollution Control in a River Basin by Interactive Fuzzy Interval Multiobjective Programming, 512

Gables
Snow Loads on Gable Roofs, 1220

Gas production
Landfill Gas As Source of VOCs in Ground Water, 1409
Manufactured Gas Plants: Yesterday's Pride, Today's Liability, 1558

Gasification
Power Generation Potential of Biomass Gasification Systems, 212

Gasoline
Enhanced TEX Biodegradation in Nutrient Briquet-Peat Barrier System, 368
Performance of a Pilot-Scale Compost Biofilter Treating Gasoline Vapor, 431

Gates
Comparison and Calibration of Canal Gate Automation Algorithms, 858
Irrotational Flow and Real Fluid Effects Under Planar Sluice Gates, 671
Loads for Fatigue Life Assessment of Gates at Navigation Locks, 811
Modeling Ice Passage at Starved Rock Lock and Dam on Illinois Waterway, 92
Optimal Design for Automatic Control of On-Demand Canal Systems, 810
Structural Design of Closure Structures for Local Flood Protection Projects, 1649
Taking in the River, 1518

Gaussian distribution
Simplified Approach to Particle Tracking Methods for Contaminant Transport, 770

Gaussian process
Efficient Simulation of Multidimensional Random Fields, 336

Geocentric datum
Three-Dimensional Azimuth of a GPS Vector, 1237

Geodesy
Combination of Photogrammetry and Geodesy for Monitoring Deformations, 1240
Effect of Mathematical Correlation on GPS Network Computation, 1234
Finite Sample Breakdown Points of Outlier Detection Procedures, 1228

Geodetic surveys
Differences Between NGVD29 and NAVD88 in Southeastern Wisconsin, 1232

Geographic information systems
A Bumpy Road, 1485
Digital Terrain Model: Elevation Extraction and Accuracy Assessment, 1231
GIS Technology for Vehicle Routing and Scheduling in Solid Waste Collection Systems, 473
GIS to Estimate Storm-Water Pollutant Mass Loadings, 453
Mapping Convergence: GIS Joins the Enterprise, 1502
Net Results, 1452
Network-Level Bridge Life-Cycle Management System, 807
Prototype SDSS for Using Probability Analysis in Soil Contamination, 428
Sediment Yield Modeling by Grouped Response Units, 1326
Thai Water Mark, 1553
Using GIS for Evaluation of Neighborhood Pedestrian Accessibility, 1309

Geoid
Height System of Taiwan from Satellite and Terrestrial Data, 1239

Geology
Finite Sample Breakdown Points of Outlier Detection Procedures, 1228

Geomembranes
Containing Contaminants (Available Only in Geoenvironmental Special Issue), 1500
Impoundment Liner Repair by Electrophoresis of Clay, 484
Leakage Through Flaws in Geomembrane Liners, 578
Model to Design QA/QC Programs for Geomembrane Liner Seams, 282
Underwater Magic, 1550

Geometric nonlinearity
First- and Second-Order Stiffness Matrices and Load Vector of Beam-Columns with Semirigid Connections, 1105
Member Stiffness for Three-Dimensional Beam-Columns, 1142
New Definition of Conservative Internal Moments in Space Frames, 224
Review of Progressive Failure Analyses for Truss Structures, 1042

Geometry
3D Modeling for Computer-Integrated Construction of RC Structures, 109
Analysis of Flow through Lateral Slot, 882
Characterization of Stream Meanders for Stream Restoration, 704
Linguistic Approach to Geometric Modeling of Hierarchical Systems, 116

Geomorphology
Flood Estimation for Ungauged Catchments Using the GIUH, 1340
Geomorphology and Kinematic-Wave–Based Hydrograph Derivation, 653
Unit Hydrograph Derivation for Ungauged Watersheds by Stream-Order Laws, 773

Geosynthetics
The Evolution of Geosynthetics, 1522
Field Performance of GCL under Ion Exchange Conditions, 615
Freeze-Thaw Cycling and Hydraulic Conductivity of Bentonitic Barriers, 547
Geosynthetic Clay Liners Permeated with Chemical Solutions and Leachates, 561
Geosynthetic Clay Liners Subjected to Differential Settlement, 564
Hydraulic Conductivity of Geosynthetic Clay Liners after Freeze-Thaw, 555
Large Model Spread Footing Load Tests on Geosynthetic Reinforced Soil Foundations, 527
Leakage Through Flaws in Geomembrane Liners, 578
Selected Factors Influencing GCL Hydraulic Conductivity, 593
Stabilization of Coastal Slopes by Anchored Geosynthetic Systems, 599

Geotechnical engineering
Gaining Ground, 1572
In Situ Remediation of the Geoenvironment, 1625

Geotextiles
Putting On Your Safety Cap, 1450
Time-Dependent Mechanical Response of HDPE Geomembranes, 526

Giardiasis
Large-Volume Samples for *Cryptosporidium* and *Giardia* from Small Streams, 377

Girders
Behavior of RC Bridge Decks with Flexible Girders, 1
Bulb-Tees Make More Efficient Long-Span Bridges, 1471
Cypress "E" Bridge Job, 1439
Girders with Corrugated Webs under Partial Compressive Edge Loading, 1118
Reliability of Reinforced Concrete Girders Under Corrosion Attack, 1062
Transient Impact Response of Bridge I-Girders with and without Flaws, 72
Yield Interaction Equations for Nominal Bending Strength of Curved I-Girders, 61

Glass
Clear Sailing, 1525
Frost Susceptibility of Crushed Glass Used as Construction Aggregate, 98
Water Works, 1508

Glass fibers
Low Temperature Strength and Notch Sensitivity of Glass Mat Polypropylene, 89
Rational Model for Multibolted Connections for GFRP Members, 135
Saving Face, 1491
Static Behavior of Pultruded GFRP Beams, 139

Glass reinforced plastics
Rational Model for Multibolted Connections for GFRP Members, 135

Global positioning
Accuracy Assessment of Digitized Data with Randomized Block Model, 1233
Communications and Tracking for Construction Vehicles, 179
Cosine Functions of GPS Carrier Phases for Parameter Estimation, 1235
Digital Terrain Model: Elevation Extraction and Accuracy Assessment, 1231
Effect of Mathematical Correlation on GPS Network Computation, 1234
Fran-Spotting, 1473
Height System of Taiwan from Satellite and Terrestrial Data, 1239
Mapping with a Differential, 1481
A New Look at Old Man River, 1506
Reliability Measures for Correlated Observations, 1236
Three-Dimensional Azimuth of a GPS Vector, 1237

Glued-laminated timber
Prestressed Glued-Laminated Timber Beam—Pilot Study, 129
Testing Methods to Determine Properties of Fiber Reinforced Plastic Panels Used for Reinforcing Glulams, 143

Goals
ASCE, Whither Goest Thou? I: History, 1024
Designers and Contractors: Impediments to Integration, 177

Mixing Probabilistic Meteorology Outlooks in Operational Hydrology, 796
Modified Critical Values for Spearman's Test of Serial Correlation, 791
Stochastic Solution to Inverse Problem in Ground Water, 767
Surface Albedo and Water Resources: Hydroclimatological Impact of Human Activities, 800
Value of Seasonal Flow Forecasts in Bayesian Stochastic Programming, 1352

Hydrostatics
Stability of Imperfect Steel Conical Tanks under Hydrostatic Loading, 1109

Hypoplasticity
Constitutive Model for 3D Cyclic Analysis of Concrete Structures, 229

Hysteresis
Analysis of Hysteretic Damping Using Analytic Signals, 300
Hysteresis Sensitive Neural Network for Modeling Rating Curves, 122
Natural Organic Matter Sorption by Kaolinite: Modified Langmuir Isotherm, 507

Hysteretic systems
Causal Hysteretic Element. II: Application, 351

I beams
Bulb-Tees Make More Efficient Long-Span Bridges, 1471
Generalized Elastic Buckling of Restrained I-beams by FEM, 1218
Lateral-Torsional Buckling of Singly-Symmetric I-Beams, 1165
Nonlinear Elastic Behavior of I-Beams Curved in Plan, 1169
Strength of Webs Subjected to Compressive Edge Loading, 1049

Ice
Concept of Effective Strain Rate: Different Approaches, 85
Fatigue Behavior of Cantilever Beams of Saline Ice, 84
Linear Elastic and Viscoelastic Deformation Behavior of Ice, 95
Mechanical Properties of First-Year Sea Ice at Tarsiut Island, 83
Modeling Ice Passage at Starved Rock Lock and Dam on Illinois Waterway, 92
Stress-Separation Curves for Saline Ice Using Fictitious Crack Model, 318

Ice control
Low-Cost Ice-Control Structure, 90

Ice cover
Flow Resistance in Ice-Covered Alluvial Channels, 706
Low-Rate Ice-Scraping Tests, 88
Measurement of Flow under Ice Covers in North America, 757
Spreading of Oil Spilled under Floating Broken Ice, 717

Ice flow
Modeling Ice Passage at Starved Rock Lock and Dam on Illinois Waterway, 92

Ice forces
Concept of Effective Strain Rate: Different Approaches, 85

Ice jams
Dusting Procedures for Advance Ice-Jam Mitigation Measures, 86
Low-Cost Ice-Control Structure, 90
A Numerical Study on Ice Transport in the Vicinity of Niagara River Hydropower Intakes, 94

Ice mechanics
Low-Rate Ice-Scraping Tests, 88
Thermoviscoelastic Constitutive Equations for Polycrystalline Ice, 87

Ice sheets
Core-Based SCB Fracture of Aligned First Year Sea Ice (Phase VI), 82
Core-Based SCB Fracture of Aligned First-Year Sea Ice (Phases III and IV), 81
Fatigue Behavior of Cantilever Beams of Saline Ice, 84

Identification
Identification of Contaminated Soils by Dielectric Constant and Electrical Conductivity, 386
Identification Problem of Open-Channel Friction Parameters, 761
Localizing a Notch in a Steel Frame from Frequency Measurements, 262
On Sequential Prediction-Error Method for Structural Identification, 226
Optimal Monitoring Network and Ground-Water–Pollution Source Identification, 1337
Parametric Identification of Truss Structures Using Static Strains, 1136
Self-Organizing Neural Network for Identification of Natural Modes, 107
Structural Identification for Condition Assessment: Experimental Arts, 1224
System Identification with Limited Observations and without Input, 272
Time-Frequency and Ambiguity Function Approaches in Structural Identification, 358
Uniform Bridge Element Identification System for Database Management for Roadway Bridges, 78

Image analysis
Application of Infrared Thermography for Pedestrian Wind Evaluation, 324
Direct Measurement of Turbulence Structures in Mixing Jar Using PIV, 380
Generation of Coherent Structures in Turbulent Boundary Layers, 294
Round Jet in Ambient Counterflowing Stream, 741

Imaging techniques
Microtomographic Measurements of Internal Damage in Portland-Cement-Based Composites, 14
Vision Cone Penetrometer for Direct Subsurface Soil Observation, 635

Impact
Computer Simulations of Roadside Crash Cushion Impacts, 1289
Experimental Analysis of Impact-Damped Flexible Beams, 257
Load Distribution and Impact Factors for I-Girder Bridges, 68

Numerical Model of Impact-Damped Continuous Systems, 258
Quantitative Impacts of Project Change: Size Issues, 186
Response of Plate and Shell Structures due to Low Velocity Impact, 354
Transient Impact Response of Bridge I-Girders with and without Flaws, 72
Vehicle-Bridge Interaction Element for Dynamic Analysis, 1205

Impact tests
Computer Simulations of Roadside Crash Cushion Impacts, 1289

Impedance
Stiffness, Flexibility, Impedance, Mobility and Hidden Delta Function. I: Theory, 350

Imperfections
Collapse Analysis of Ring-Stiffened Cylinders Using Ring Elements, 256
Micromechanical Analysis of Imperfectly Bonded Layered Media, 325
Postcritical Imperfection-Sensitive Buckling and Optimal Bracing of Large Regular Frames, 1087
Stability of Imperfect Steel Conical Tanks under Hydrostatic Loading, 1109

Implementation
Five Years of Australian Limit States Steel Design, 1013

Impoundments
Impoundment Liner Repair by Electrophoresis of Clay, 484

In situ tests
Application of Piezoelectric Film in Cavitation Research, 701
Cavity Expansion and Penetration Resistance in Sand, 559
Evaluation of Laterally Loaded Pile Group at Roosevelt Bridge, 643
Field Implications of Current Compaction Specification Design Practices, 194

Incentives
Economic Principles of Contractor Compensation, 939
Incentive/Disincentive Provisions in Highway Contracts, 185
Partnering Process Model, 916
Planned Schedule Compression Concept File for Electrical Contractors, 170

Incident assessment
New Model for Predicting Freeway Incidents and Incident Delays, 1276

Incineration
Quantifying Externalities in Solid Waste Management in Hong Kong, 399
Remediation of Hazardous-Waste Sites by New England Division of U.S. Army Corps of Engineers, 1410
Sorption and Speciation of Heavy Metals from Incinerator Fly Ash in a Marine Clay, 499
Theoretical and Experimental Study of Metal Capture During Incineration Process, 498

Incinerators
Incineration of Wastes in Novel High-Efficiency Tumbling and Rotating Fluidized Bed Incinerator, 491
Modeling of Turbulent Burning Flow and Performance Evaluation of Municipal Solid Incinerator, 505

India
Rip Current Zones along Beaches in Goa, West Coast of India, 1396

Serviceability Analysis of Concrete Sections under Biaxial Bending, 1041

Settlement analysis
Batch Analysis of Slurries in Zone Settling Regime, 444
Design Method for Drilled Shafts in Soft Argillaceous Rock, 551
Feasibility Study on Freeze/Thaw Conditioning of Pulp Mill Waste Activated Sludge, 93
Flowable Slurry Containing Foundry Sands, 965
Plane-strain Modeling of Smear Effects Associated with Vertical Drains, 572
Preparing for Repair (Available only in Geoenvironmental Special Issue), 1533
Seismic Response of Shallow Foundation on Liquefiable Sand, 581
Settlement of Reinforced Sand in Foundations, 608
Settling Characteristics of Sediments in Moving Bingham Fluid, 733

Settlement control
Compensation Grouting, 1446
Method Used to Salvage Warehouse Subjected to Severe Settlement, 1438
Rubber Meets the Road in Maine, 1541

Settling basins
Design of Single-Chamber Settling Basins, 694

Settling velocity
Effect of Concentration on Settling Velocity of Sediment Particles, 724
Erosion of Fluid Mud Layers. I: Entrainment Model, 697
Erosion of Fluid Mud Layers. II: Experiments and Model Validation, 698
Settling Characteristics of Sediments in Moving Bingham Fluid, 733
Simplified Settling Velocity Formula for Sediment Particle, 662

Sewage
Septic Tank–Soakpit Systems in Dar es Salaam, Tanzania, 378

Sewage sludge
Demonstrating Virus Treatment Efficiencies for Biosolids, 492
Incineration of Wastes in Novel High-Efficiency Tumbling and Rotating Fluidized Bed Incinerator, 491
Treatment of Phthalic Waste by Anaerobic Hybrid Reactor, 497

Sewage treatment
Incineration of Wastes in Novel High-Efficiency Tumbling and Rotating Fluidized Bed Incinerator, 491

Sewer pipes
Investigation of Sewer-Line Failure, 987
Performance Testing of Trenchless Wastewater Line Spot Repairs, 808
Rerouting Boston's Utilities, 1571

Sewers
Beneficial Discharge of Iron Coagulation Sludge to Sewers, 488
Bottom Outlet for Sewers, 861
Case Study of Check Valve Slam in Rising Main Protected by Air Vessel, 772
Compensation Grouting, 1446
Discharge Measurement in Circular Sewer, 843
Manhole Inspection and Rehabilitation, 1634
Overflow Control, 1505
Use of Iron Salts to Control Dissolved Sulfide in Trunk Sewers, 13
Ventilation of Industrial Process Drains: Mechanisms and Effects on VOC Emissions, 478

Shafts
Observations on Flow in Vertical Dropshafts in Urban Drainage Systems, 424
Torsion of Nonlinear Viscous Shafts, 252

Shake table tests
Analytical Modeling of High Damping Rubber Bearings, 1149
Seismic Analysis and Design for Soil-Pile-Structure Interactions, 1643
Study of Elastoplastic Bridge Seismic Isolation System, 1084

Shale
Expanded Clay and Shale Aggregates for Leachate Collection Systems, 629

Shallow foundations
Seismic Response of Shallow Foundation on Liquefiable Sand, 581

Shallow water
Absorbing-Generating Boundary Condition for Shallow Water Models, 1394
Modeling Flow and Transport in Drainage Areas with Shallow Ground Water, 852
Radial Flow Modeling for Estimating Level-Basin Irrigation Parameters, 859
Reservoir Flow Prediction by Contravariant Shallow Water Equations, 689
Septic Tank–Soakpit Systems in Dar es Salaam, Tanzania, 378
Shallow-Water Flow around Model Conical Islands of Small Side Slope. Part I: Surface Piercing, 759
Shallow-Water Flow around Model Conical Islands of Small Side Slope. Part II: Submerged, 760
Solitary Wave Solution to the Boussinesq Equations, 1373
Unconfined Expansion of Supercritical Water Flow, 265
Water Quality as Design Criterion in Drainage Water Management Systems, 846

Shape
Effect of Shape on Uniform Flow in Smooth Rectangular Open Channels, 715
Hydrodynamic Modeling of Basin Irrigation, 883
Posttensioned and Shaped Hypar Space Trusses, 1043
A Turnaround for Hangar Design, 1493

Shape memory effect
Intelligent Civil Engineering Materials and Structures, 1628

Shear
Approximate Analysis of Irregular Slab-on-Girder Bridges, 58
Dynamic Patterning of Shear Bands in Cosserat Continuum, 227
Transformation of Elastic Properties for Lumber with Cross Grain, 1192
Undrained Shear Band Deformation in Granular Media, 281

Shear deformation
Dynamic Response of Plane Anisotropic Beams with Shear Deformation, 359
Refined Asymptotic Theory of Doubly Curved Laminated Shells, 355
Relationships Between Buckling Loads of Kirchhoff, Mindlin, and Reddy Polygonal Plates, 342
Viscoelastic Timoshenko Beam Solutions from Euler-Bernoulli Solutions, 301

Shear failure
Cracking and Punching Shear Failure Analysis of RC Flat Plates, 1183
Fracturing Truss Model: Size Effect in Shear Failure of Reinforced Concrete, 360
Modeling of Dilative Shear Failure, 585

Shear flow
Spectral Energy Transfer in Transition of Plane Wake, 314

Shear lag
Shear Lag in Bolted Angle Tension Members, 1162

Shear modulus
Low Strain Shear Moduli of Cemented Sands, 579
Reduction of Shear Modulus at Small Strains in Simple Shear, 630
Stiffness of Toyoura Sand from Dilatometer Tests, 610

Shear strength
Shear and Flexural Strengthening of R/C Beams with Carbon Fiber Sheets, 1133
Shear Behavior of URM Retrofitted with FRP Overlays, 130
Shear Reinforcement of Wood Using FRP Materials, 961
Shear Strength of Mexican Pine. I: In-Grade Testing Program, 1154
Shear Strength of Solid-Sawn Douglas-Fir Beams, 969
Slope Stability Analyses in Stiff Fissured Clays, 558
Triaxial Determination of Shear Strength of Tire Chips, 573

Shear stress
Cyclic Simple-Shear Behavior of Sand-Steel Interfaces Under Constant Normal Stiffness Condition, 637
Kinematic Undertow Model with Logarithmic Boundary Layer, 1400
Mechanism of Energy Transportation and Turbulent Flow in a 3D Channel, 718
Strengthening of Beams by Plate Bonding, 980
Turbulent Structure in Unsteady Depth-Varying Open-Channel Flows, 727

Shear tests
Low-Cycle Fatigue Test on Stud Shear Connectors, 1045
Shear Strength of Mexican Pine. I: In-Grade Testing Program, 1154
Shear Strength of Solid-Sawn Douglas-Fir Beams, 969
Static Racking Behavior of Plywood, OSB, Gypsum, and FiberBond Walls with Metal Framing, 1155

Shear walls
Analysis of Thin-Steel-Plate Shear Walls, 1202
Engineered versus Standard Studs in Shearwall Test Panels, 1426
Lateral Resistance of Wood Shear Walls with Large Sheathing Panels, 1223
Method Used to Salvage Warehouse Subjected to Severe Settlement, 1438
Multisurface Interface Model for Analysis of Masonry Structures, 291

Shear waves
Liquefaction at Moss Landing During Loma Prieta Earthquake, 570

Sheet metal
Ductility of G550 Sheet Steels in Tension, 1213

Sheet piles
Effectivity of Multiple Sheet Piles in Weir Design, 857

Shell structures
Carbon FRP Strengthening of Doubly Curved Precast PC Shell, 144
Refined Asymptotic Theory of Doubly Curved Laminated Shells, 355
Response of Plate and Shell Structures due to Low Velocity Impact, 354

Shellfish
Modes of Byssal Failure in Forced Detachment of Zebra Mussels, 477

Use of UASB Technology to Treat Crab Processing Wastewaters, 458

Shells

Plastic Buckling Approximation for Transition Ringbeams in Steel Silos, 1217

Vibration of Thick Doubly-Curved Stress Free Shallow Shells of Curvilinear Planform, 261

Ship bridge collisions

Bridge Bashing, 1478

Ships

Bridge Bashing, 1478

Shoaling

Breaking Criterion and Characteristics for Solitary Waves on Slopes, 1369

Vertical Structure of Horizontal Velocity in Regular Shoaling Waves, 1372

Shock waves

Supercritical Bend Flow, 670

Unconfined Expansion of Supercritical Water Flow, 265

Shoreline changes

Analytical Solutions of One-Line Model for Shoreline Change near Coastal Structures, 1378

Wave Resolution Effects on Predicted Shoreline Positions, 1360

Shores

Experimental Investigation of Performance of Wooden Formwork Shores, 989

Shoring

Observations from Shore Load Measurements during Concrete Construction, 984

Performance of Scaffold Frame Shoring under Pattern Loads and Load Paths, 164

Structural Modeling and Analysis of Modular Falsework Systems, 1174

Shotcrete

Use of Set Accelerating Admixtures in Dry-Mix Shotcrete, 976

Shrinkage

Flowable Slurry Containing Foundry Sands, 965

Simplified Approach to Evaluate Creep and Shrinkage Effects in Steel-Concrete Composite Beams, 1163

Shrinkage cracking

Bridge Deck Construction Using Type K Cement, 77

Sight distances

Design Considerations for Combined Highway Alignments, 1248

Signal processing

Acoustic Emission Source Location Using Lamb Wave Modes, 230

Time-Frequency and Ambiguity Function Approaches in Structural Identification, 358

Signalized intersections

Frequency of Probe Reports and Variance of Travel Time Estimates, 1279

Review of Models Combining Traffic Assignment and Signal Control, 1259

Signals

Analysis of Hysteretic Damping Using Analytic Signals, 300

Silicates

Performance Study of Portland Cement Concrete Pavement Joint Sealants, 1293

Silos

Constructability Improvement of Steel Silos during Field Operations, 148

Estimating Resource Requirements at Conceptual Design Stage Using Neural Networks, 123

Plastic Buckling Approximation for Transition Ringbeams in Steel Silos, 1217

Silts

Frost Heave Loading of Constrained Footing by Centrifuge Modeling, 614

Tidal Characteristics of Suspended Sediment Concentrations, 681

Similitude

Oxygen Transfer Similitude for Vented Hydroturbine, 700

Simple shear

Effect of Degradation on Seismic Response of Israeli Continental Slope, 529

Simple shear tests

Factors Affecting Apparent Position of Steady-State Line, 552

Reduction of Shear Modulus at Small Strains in Simple Shear, 630

Simulation

Extended Linear Refraction-Diffraction Model, 1391

Fluidization Response of Sediment Bed to Rapidly Falling Water Surface, 1388

Numerically Simulating Non-Gaussian Sea Surfaces, 1365

Petri Nets for Simulation and Modeling of Construction Systems, 160

A Probabilistic Model for A Tunneling Project using A Markov Chain, 203

Quasi–Two-Dimensional Simulation of Scour and Deposition in Alluvial Channels, 707

Rank Correlations in Simulating Construction Costs, 184

Simulation Laboratory for Evaluating Dynamic Traffic Management Systems, 1278

Simulation of Fire Environment for Linear Atria in Hong Kong, 44

Simulation of Multivariate Nonstationary Random Processes: Hybrid DFT and Digital Filtering Approach, 363

Simulation of Punching Failure in Reinforced-Concrete Structures, 1103

Unsteady Turbulent Flow Past Solid Fence, 703

Simulation models

Benefits of Dipped Vertical Alignments for Rail Transit Routes, 1243

Combined Discrete-Event/Continuous Simulation for Project Planning, 147

Comparison of Methods for Yield Assessment of Multiple Reservoir Systems, 1355

Comprehensive Level of Service: Needed Approach for Civil Infrastructure Systems, 820

Effect of Roots on Water Flow in Unsaturated Soils, 854

Crack Growth and Lifetime of Concrete under Long Time Loading, 254
Ductile Crack as Trigger of Brittle Fracture in Steel, 1112
Fracturing Truss Model: Size Effect in Shear Failure of Reinforced Concrete, 360
Reversal in Failure Scaling Transition of Fibrous Composites, 225
Shear Strength of Mexican Pine. I: In-Grade Testing Program, 1154
Simulation of Punching Failure in Reinforced-Concrete Structures, 1103
Size Dependence of Strength and Fracture Properties of Brick Masonry Walls, 311
Size Effect in Compression Fracture: Splitting Crack Band Propagation, 231
Size Effect Tests of High Strength Concrete, 958

Skewness
Bending Analysis of Simply Supported shear Deformable Skew Plates, 237

Skin friction
Influence of Pile Plugging on Skin Friction in Overconsolidated Clay, 577
Vertical Vibration of Pile in Vibration-Induced Excess Pore Pressure Field, 566

Slabs
Composite Beams Subjected to Static and Fatigue Loads, 1116
Deep-Footing and Wide-Slab Effects in Reinforced Sandy Ground, 523
Direct Assessment of Safe Strengths of RC Slabs under Membrane Action, 1184
Full Use of Arching in Deck Slabs (Available only in Structural Engineering Special Issue), 1513
Robert Maillart's Design Approach for Flat Slabs, 1158
Temperature Effects on Cellular Rigid Pavement Compared to Flat Slabs, 1258
Two-Way Slab Design Expert System, 1433

Slag
Use of Pyrolyzed Carbon Black as Additive in Hot Mix Asphalt, 1304

Sliding
Frictional Response of PTFE Sliding Bearings at High Frequencies, 73

Slip
Cracking Analysis of RC Members by Using Coupled BE-FE Modeling, 304
Low-Cycle Fatigue Test on Stud Shear Connectors, 1045
Relationship of Bond Stress, Steel Stress, and Slip in Reinforced Concrete, 1036
Three-Dimensional Modeling of Concrete Structures. II: Reinforced Concrete, 1186

Slope stability
Balancing Act (Available only in Geoenvironmental Special Issue), 1532
Slope Failures in Tertiary Expansive OC Clays, 607
Slope Instability Caused by Small Variations in Hydraulic Conductivity, 597

Slope Stability Analyses in Stiff Fissured Clays, 558
Stability of Uniformly Reinforced Slopes, 580
Stabilization of Coastal Slopes by Anchored Geosynthetic Systems, 599

Slope stabilization
Design Method for Stabilization of Slopes with Piles, 556

Slopes
Bed Load–Sediment Transport on Steep Longitudinal Slopes, 766
Earth Pressures with Sloping Backfill, 549
Erosional Creep of Fluid-Saturated Granular Medium, 290
Modified Newmark Model for Seismic Displacements of Compliant Slopes, 588
Reliability Analysis of Rock Wedges, 574
Shallow-Water Flow around Model Conical Islands of Small Side Slope. Part I: Surface Piercing, 759
Shallow-Water Flow around Model Conical Islands of Small Side Slope. Part II: Submerged, 760
Soil-Related Damage to Tilt-Up Structures, 1430
Wave Kinematics at Steep Slopes: Second-Order Model, 1383

Slots
Analysis of Flow through Lateral Slot, 882

Sludge
Anaerobic Biogranulation as Microbial Response to Substrate Adequacy, 485
Beneficial Discharge of Iron Coagulation Sludge to Sewers, 488
Effect of Lime-Stabilized Sludge as Landfill Cover on Refuse Decomposition, 10
Feasibility Study on Freeze/Thaw Conditioning of Pulp Mill Waste Activated Sludge, 93
Laboratory and Field Hydraulic Conductivity of Three Compacted Paper Mill Sludges, 590
Parameters Affecting Conditioning Enhancement of Biosolids by Electron Beam Treatment, 406

Sludge drying
Natural Sludge Dewatering. I: Combination of Natural Freezing, Thawing, and Drying as Methods, 79
Natural Sludge Dewatering. II: Thawing-Drying Process in Full-Scale Sludge Freezing Ditches, 80

Sludge treatment
Feasibility Study on Freeze/Thaw Conditioning of Pulp Mill Waste Activated Sludge, 93

Slurries
Batch Analysis of Slurries in Zone Settling Regime, 444
Consolidation Properties of Soil Slurries from Hydraulic Consolidation Test, 603
Flowable Slurry Containing Foundry Sands, 965
Permeability of Flowable Slurry Materials Containing Foundry Sand and Fly Ash, 569

Slurry walls
Containing Contaminants (Available Only in Geoenvironmental Special Issue), 1500

Smoke control
Study on Smoke Movement and Control for Fires in Apartments, 45

Snow cover

Detection of Underground Obstacles by SASW Method—Numerical Aspects, 545
Response of Olive View Hospital to Northridge and Whittier Earthquakes, 1073
Review of Recent Developments in Tidal Hydrodynamic Modeling. I: Spectral Models, 676
Spectral Energy Transfer in Transition of Plane Wake, 314

Speeches
Getting Into the Act, 1562

Speed
Effects of Air Valves and Pipework on Water Hammer Pressures, 1252
Probabilistic Speed-Estimation Measurement Errors Through Video Images, 1257

Speed changes
Benefits of Dipped Vertical Alignments for Rail Transit Routes, 1243

Speed control
Neurosimulation Modeling of a Scheduled Bus Route, 1272

Spills
Predicting Traveltime and Dispersion in Rivers and Streams, 749

Spillways
Prediction of Effective Saturation Concentration at Spillway Plunge Pools, 746

Splitting
2D Numerical Study on Tidal Circulation in Strait of Dover, 1358

Sports
Spectator Live Loads During Football Games, 1209

Spraying
Advection Distance of Water Droplets in Strong Winds, 1393

Spread foundations
Bearing Pressures for Rectangular Footings with Biaxial Uplift, 60
Large Model Spread Footing Load Tests on Geosynthetic Reinforced Soil Foundations, 527

Spreadsheets
Efficient Reliability Evaluation Using Spreadsheet, 302
Integrated Spreadsheets, 1504
Timber Column Design/Analysis Spreadsheet Program, 1429

Stability
Amplitude and Turbulence Effects on Bridge Flutter Derivatives, 1056
Deep Rotational Stability of Tiedback Excavations in Clay, 575
Defining Biosolids Stability, 508
FEM and Analytical Solutions for Buckling of Nonlinear Masonry Members, 1039
First- and Second-Order Stiffness Matrices and Load Vector of Beam-Columns with Semirigid Connections, 1105
Global Stability of a Thick Solid Supported by Elastica Columns, 245
Influence of Nonlinear Constitutive Law on Masonry Pier Stability, 1181
Invalidity of Preissmann Scheme for Transcritical Flow, 714
Mechanical Behavior of Interconnected Concrete-Block Retaining Wall, 543
Plastic Buckling Approximation for Transition Ringbeams in Steel Silos, 1217
Predicting Stability of Lift Slab Structures by Energy Method, 999
Reliability-Based Partial Safety Factors in Cantilever Construction of Concrete Bridges, 1064
Review of Progressive Failure Analyses for Truss Structures, 1042
Short Sewer Sideweir, 876
Stability, Free Vibration, and Bending Behavior of Multistiffened Plates, 251
Stability of Actively Controlled Structures with Actuator Saturation, 1086
Stability of Columns in Unbraced Frames, 1139
Stability of Nonlinear Two-Frequency Oscillation of Cylindrical Shells, 331
Stability of Simple Beam Subjected to Multiple Seismic Excitations, 299
Stability of Steel Columns in Case of Fire: Numerical Modeling, 1110
Stable Width of an Alluvial Channel, 833

Stability analysis
Analysis of Meandering Water Rivulets of Finite Amplitude, 752
Channel Stability Assessment for Flood Control Projects, 1587
Defining Biosolids Stability, 508
Design Method for Stabilization of Slopes with Piles, 556
Effective Length and Notional Load Approaches for Assessing Frame Stability: Implications for American Steel Design, 1602
Elastic Stability of Beam-Columns with Flexural Connections under Various Conservative End Axial Forces, 1168
Pinpointing Bifurcation Points and Branch-Switching, 233
Stability of Imperfect Steel Conical Tanks under Hydrostatic Loading, 1109
Stability of Retaining Walls Against Overturning, 604
Story Stability of Braced, Partially Braced, and Unbraced Frames: Classical Approach, 1120
Weakly Nonlinear Stability Analysis for Dune Formation, 750

Stabilization
Field Behavior of Excavation Stabilized by Deep Soil Mixing, 576
Field Performance of Nailed Soil Wall in Residual Soil, 995
Ground Improvement, Ground Reinforcement and Ground Treatment: Developments 1987-1997, 1614
Saving the Bluffs: Engineering at the Edge, 1567

Stable channels
Stable Width of an Alluvial Channel, 833

Stainless steel
Explicit Approach to Design of Stainless Steel Columns, 1127

Standard penetration tests
SPT Dynamic Analysis and Measurements, 618

Standardization
Standardization of Steel Pole Design Using Discrete Optimization, 1069

Standards
Air-Supported Structures, 1581
ASCE Design Standard for Pultruded Fiber-Reinforced-Plastic (FRP) Structures, 131
Automated People Mover Standards—Part 1, 1584
Construction Safety Affected by Codes and Standards, 1594
Design of Beam-Columns in Steel Frames. I: Study of Philosophies and Procedures, 1210
Design of Beam-Columns in Steel Frames. II: Comparison of Standards, 1211
Ductility of G550 Sheet Steels in Tension, 1213
Engineering and Construction Industry Standards Developers, 913
International Standards and Construction, 163
ISO 14000: Legal Advantages of Replacing Command and Control Regulation, 1417
Licensed Site Professional Programs: Need for Uniformity among States, 1420
Standard Guidelines for the Design and Installation of Pile Foundations, 1647

Structural Applications of Steel Cables for Buildings, 1648
Will the Real ISO 14001 Please Stand Up, 1560
Wind Loading for Roof Trusses Using ASCE Standard, 1432

Standing waves
Indirect Velocity Measurement from Standing Waves in Rockbed Rivers, 744
Soil Response in Cross-Anisotropic Seabed due to Standing Waves, 521
Standing Waves: Transmission Line Failure Caused by Reflected Energy, 1000

State government
Economical Control of Discharges from Petroleum Tank Farms, 1423

State-of-the-art reviews
Behavior and Modeling of Bond of FRP Rebars to Concrete, 132
Fatigue Reliability Reassessment Applications: State-of-the-Art Paper, 1061
Fatigue Reliability Reassessment Procedures: State-of-the-Art Paper, 1060
Modeling Bolted Connections in Wood: Review, 1152
Seismic Design of Secondary Structures: State of the Art, 1147
Structural Control: Past, Present and Future, 322

Static loads
Probability Method Applied to Dynamic Pile-Driving Control, 536

Static tests
Determination of *E*-Modulus of Young Concrete with Nondestructive Method, 953
Parametric Identification of Truss Structures Using Static Strains, 1136
Static Behavior of Pultruded GFRP Beams, 139
Structural Model Updating Using Experimental Static Measurements, 1119

Statics
Static Output Polynomial Control for Linear Structures, 289
Statics Experiments on an Elastic Catenary, 365

Stationary processes
Simulation of Multivariate Nonstationary Random Processes: Hybrid DFT and Digital Filtering Approach, 363

Statistical analysis
Accuracy of Irrigation Efficiency Estimates, 886
Are Contract Disputes Predictable?, 12
Cosine Functions of GPS Carrier Phases for Parameter Estimation, 1235
Equivalent Statistical Quadratization and Cubicization for Nonlinear Systems, 273
Estimating Flood Frequency and Average Annual Damage, 1324
Functional Illiteracy in Construction Industry, 167
Hysteretic Behavior Characterization of Friction-Damped Braced Frames, 1148
Prediction of Project Performance Based on Degree of Interaction, 905
Relative Performances of Textural Models in Estimating Soil Moisture Characteristic, 855
Robust Statistical Estimators for Use within Competitive Bid Data, 153
Stochastic Solution to Inverse Problem in Ground Water, 767

Statistical distributions
Rational Approach to Comparison of Flood Distributions by Simulation, 785

Statistical models
Estimating Magnitude and Duration of Incident Delays, 1300
Modeling Demand for Public Transit Services in Rural Areas, 1270
Probabilistic Infrastructure Deterioration Models with Panel Data, 803
Sample Size Needs for Characterizing Pollutant Concentrations in Highway Runoff, 493

Statistics
Modified Critical Values for Spearman's Test of Serial Correlation, 791
Spectral Energy Transfer in Transition of Plane Wake, 314

Steady flow
Analytic Benchmark Solutions for Open-Channel Flows, 758
Chaotic Advections for Stokes Flows in Circular Cavity, 306
GVF Computation in Tree-Type Channel Networks, 720
Relationship of Critical Flow in Waterfall to Minimum Energy Head, 654
Reliability of Steady Surface Profile in Irrigation Canal, 827
Scaling Relationships for Sand Wave Development in Unidirectional Flow, 769
Spatially Varied Flow over an Embankment Side Weir, 871

Steady state
Experimental Analysis of Impact-Damped Flexible Beams, 257
Factors Affecting Apparent Position of Steady-State Line, 552
Modeling Biofiltration of VOC Mixtures under Steady-State Conditions, 438
Modeling of Free Surface in Steady-State Radial Seepage, 778
Stability of Nonlinear Two-Frequency Oscillation of Cylindrical Shells, 331
Steady-State Local-Scale Analysis of Surface Flows over Rill-Interrill Areas, 716

Steady state models
Model of Bacterial-Supplement Kinetics, 462

Steel
Composite Construction in Steel and Concrete III, 1591
Cyclic Simple-Shear Behavior of Sand-Steel Interfaces Under Constant Normal Stiffness Condition, 637
Ductile Crack as Trigger of Brittle Fracture in Steel, 1112
Effect of Severe Corrosion on Cyclic Ductility of Steel, 1201
Experimental Load Rating Study of a Historic Truss Bridge, 59
Finite-Element Analysis of Steel Girder Highway Bridges, 66

Low-Cycle Fatigue Test on Stud Shear Connectors, 1045
Method for Seismic Base Isolation of Liquid-Storage Tanks, 1040
Relationship of Bond Stress, Steel Stress, and Slip in Reinforced Concrete, 1036
Reliability of Reinforced Concrete Girders Under Corrosion Attack, 1062
Review of Current Test Methods for Screwed Connections, 1066
Shear Lag in Bolted Angle Tension Members, 1162
A Signature Bridge for Boston (Available only in Structural Engineering Special Issue), 1501
Simplified Approach to Evaluate Creep and Shrinkage Effects in Steel-Concrete Composite Beams, 1163
Spectator Live Loads During Football Games, 1209
Stability of Imperfect Steel Conical Tanks under Hydrostatic Loading, 1109
Standardization of Steel Pole Design Using Discrete Optimization, 1069
Static Racking Behavior of Plywood, OSB, Gypsum, and FiberBond Walls with Metal Framing, 1155
Steel Reinforced Concrete Structures in 1995 Hyogoken-Nanbu Earthquake, 1144
Story Stability of Braced, Partially Braced, and Unbraced Frames: Classical Approach, 1120
Strength Curves for Metal Columns, 1111
Structural Applications of Steel Cables for Buildings, 1648
Upgrading of Nonductile Reinforced Concrete Frame Connections, 1146
Water Works, 1508

Steel beams

Analytical Modeling of Dual Panel Zone in Haunch Repaired Steel MRFs, 1030
Composite Beams Subjected to Static and Fatigue Loads, 1116
Inelastic Buckling of Steel Beams with Central Torsional Restraints, 1166

Steel cables

Structural Applications of Steel Cables for Buildings, 1648

Steel columns

Analytical Modeling of Dual Panel Zone in Haunch Repaired Steel MRFs, 1030
Appraisal of Partially Restrained Steel Columns in Nonsway Frames, 1129
Interactive Buckling Behavior and Ultimate Load of I-Section Steel Columns, 1170
Stability of Steel Columns in Case of Fire: Numerical Modeling, 1110

Steel fibers

Cyclic Behavior of Steel-Fiber Mortar Overlaid Concrete Beams, 954
Damage-Based Modeling of Fiber Pullout Under Variable Compressive Stress, 253

Steel frames

Analytical Modeling of Dual Panel Zone in Haunch Repaired Steel MRFs, 1030
Braced for Failure (Available only in Structural Engineering Special Issue), 1512
Design of Beam-Columns in Steel Frames. I: Study of Philosophies and Procedures, 1210
Design of Beam-Columns in Steel Frames. II: Comparison of Standards, 1211
Effective Length and Notional Load Approaches for Assessing Frame Stability: Implications for American Steel Design, 1602
Localizing a Notch in a Steel Frame from Frequency Measurements, 262
Nonlinear Dynamic Analysis of Steel Frames by Modal Superposition, 1206
Second-Order Analysis of Slender Steel Frames under Distributed Axial and Member Loads, 1167
Stability of Columns in Unbraced Frames, 1139
Static Response of Infilled Frames Using Quasi-Static Experimentation, 1199

Steel plates

Analysis of Thin-Steel-Plate Shear Walls, 1202
Finite Element Analysis of Unstiffened Flush End-Plate Bolted Joints, 1216

Steel structures

Acoustic Emission Source Location Using Lamb Wave Modes, 230
Constructability Improvement of Steel Silos during Field Operations, 148
Design of Hydraulic Steel Structures, 1599
Distributed Neural Dynamics Algorithms for Optimization of Large Steel Structures, 1130
Five Years of Australian Limit States Steel Design, 1013
Inelastic Analysis and Design: Frames with Members in Minor-Axis Bending, 1046
Method Used to Salvage Warehouse Subjected to Severe Settlement, 1438
Optimum Load and Resistance Factor Design of Steel Space-Frame Structures, 1050
Plastic Buckling Approximation for Transition Ringbeams in Steel Silos, 1217

Stiffeners

Buckling Experiments on Hollow Flange Beams with Web Stiffeners, 1160
Collapse Analysis of Ring-Stiffened Cylinders Using Ring Elements, 256
Crossover of Integral-Ring Buckle Arrestor: Computational Results, 255
Finite-Element Analysis of Hollow Flange Beams with Web Stiffeners, 1159
Ritz Method for Vibration Analysis of Cylindrical Shells with Ring Stiffeners, 228

Stiffening

Tension Stiffening Behavior of Reinforced Masonry, 1097

Stiffness

Analysis of Crosstie Track in Lateral Plane Using New Track Equations, 1268
Causal Hysteretic Element. II: Application, 351
Dynamic Stiffness of Foundations on Saturated Poroelastic Soils, 341
Equivalent Statistical Cubicization for System and Forcing Nonlinearities, 321
Evaluation of Pultruded FRP Composites for Structural Applications, 972
Evaluation of Rigidity of Extended End-Plate Connections, 1214

Hybrid Inverse Mode Problem for Structure-Foundation Systems, 249
Lateral Resistance of Wood Shear Walls with Large Sheathing Panels, 1223
Member Stiffness with Offset Hinges, 1089
Method for Estimating Postcyclic Undrained Secant Modulus of Clays, 544
Natural Periods of Long-Span Cable-Stayed Bridges, 69
Prediction of Pavement Response during Freezing and Thawing Using Finite Element Approach, 97
Stability, Free Vibration, and Bending Behavior of Multistiffened Plates, 251
Stiffness, Flexibility, Impedance, Mobility and Hidden Delta Function. I: Theory, 350
Stiffness of Toyoura Sand from Dilatometer Tests, 610

Stiffness matrix
Cable-Stayed Bridges—Parametric Study, 64
Development of Embedded Bending Member to Model Dowel Action, 1182
Elastic and Inelastic Buckling Analysis of Thin-Walled Tapered Members, 298
First- and Second-Order Stiffness Matrices and Load Vector of Beam-Columns with Semirigid Connections, 1105
Member Stiffness for Three-Dimensional Beam-Columns, 1142

Stilling basins
Oblique and Vertical Jet Dispersion in Channels, 692

Stochastic models
Efficient Simulation of Multidimensional Random Fields, 336
Extreme Hydraulic Gradient Statistics in Stochastic Earth Dam, 625
Fully Nonstationary Analytical Earthquake Ground-Motion Model, 215

Stochastic processes
Local Solutions of Laplace, Heat, and other Equations by Itô Processes, 312
Optimal Stochastic Multicrop Seasonal and Intraseasonal Irrigation Control, 1319
Response Cumulant Equations for Dynamic Systems under Delta-Correlated Processes, 232
Stability of Simple Beam Subjected to Multiple Seismic Excitations, 299
Stochastic Solution to Inverse Problem in Ground Water, 767
Stochastic Theory for Irregular Stream Modeling. II: Solute Transport, 708
Value of Seasonal Flow Forecasts in Bayesian Stochastic Programming, 1352

Stoichiometry
Temperature Effects on Physiology of Biological Phosphorus Removal, 383

Stone columns
Liquefaction Failure and Remediation: King Harbor Redondo Beach, California, 602

Stones
Composite Fibers for External Reinforcement of Natural Stone, 138
Degradation of Natural Building Stone, 1596
Rut Susceptibility of Large Stone Mixtures, 1247
Tower of Montecchio Stress Analysis of Southeast Wall, 1443

Storage
Surface Storage in Furrow Irrigation Evaluation, 884

Storage facilities
Better Salt Storage, 1472

Storage tanks
Mechanical Analogies for Liquid Storage Tanks and Action of Eccentric Gravity Loads, 279
Method for Seismic Base Isolation of Liquid-Storage Tanks, 1040
Optimization of CSO Storage and Treatment Systems, 397
Seismic Response of Soil-Supported Unanchored Liquid-Storage Tanks, 1079

Storm runoff
Estimation of Annual Pollutant Loads under Wet Weather Conditions, 802
NOM and Trace Metal Attenuation During Storm-Water Infiltration, 789
Partitioning and First Flush of Metals in Urban Roadway Storm Water, 382
Sample Size Needs for Characterizing Pollutant Concentrations in Highway Runoff, 493

Storm sewers
Short Sewer Sideweir, 876

Storm surges
Dynamic Coupling of Wave and Surge Models by Eulerian-Lagrangian Method, 1357
Progress and Recent Developments in Storm Surge Modeling, 679

Storms
Analysis of Storm-Damage Factors for Low-Rise Structures, 1003
Effect of Wave-Enhanced Bottom Friction on Storm-Driven Circulation in Massachusetts, 1384
Evaluation of Storm Loadings on and Capacities of Offshore Platforms, 1366
On Scour's Frontier, 1530
Wave Transformation during Extratropical Storm, 1387

Stormwater
Control Strategy for Storm-Generated Sanitary-Sewer Overflows, 371
Estimation of Annual Pollutant Loads under Wet Weather Conditions, 802
GIS to Estimate Storm-Water Pollutant Mass Loadings, 453
NOM and Trace Metal Attenuation During Storm-Water Infiltration, 789
Particles, Metals, and Water Quality in Runoff from Large Urban Watershed, 455
Partitioning and First Flush of Metals in Urban Roadway Storm Water, 382
"Permanent Runoff Controls", 1552
Sediment and Heavy Metal Accumulation in Dry Storm Water Detention Basin, 1349

Stormwater management
Above Par Storm-Water Management, 1517
Chance Constrained Model for Storm-Water System Design and Rehabilitation, 1333

Economical Control of Discharges from Petroleum Tank Farms, 1423
Multiobjective Watershed-Level Planning of Storm-Water Detention Systems, 1353

Strain
Analysis of Piezoresistance Gauges for Stress in Divergent Flow Fields, 217
Load Distribution and Impact Factors for I-Girder Bridges, 68
Optimal Fiber Optics, 1511
Program BIMODPAV for Analysis of Flexible Pavements, 1246
Relative Earthquake Motion of Building Foundations, 1076
Transition between Fatigue and Ductile Fracture in Steel, 1128

Strain energy
Evaluation of Rib/Skin Fracture in Composite Isogrid, 223

Strain gages
Propagation of Explosive Pulses in Assemblies of Disks and Spheres, 333

Strain rate
Concept of Effective Strain Rate: Different Approaches, 85
Deformation Mechanisms of Pure Bitumen, 968
Experimental Verification of CRS Consolidation Theory, 567
Influence of Strain-Rate on Coagulation Kinetics, 419
Strain Rate Effects in Model Pressuremeter Testing, 632

Strain softening
Effect of Length on Compressive Strain Softening of Concrete, 216
Propagation of Waves in Rate-Dependent Plastic Softening Rod and Beam, 234
Strain-Softening of Laterally Reinforced Concrete Panels in Compression, 1094
Three-Dimensional Modeling of Concrete Structures. I: Plain Concrete, 1185

Strategic planning
Facility Management Value-Adding Functional Analysis Model, 55
Re-Engineering an Engineering Consultant, 898
Selecting Long-Term Strategies for Construction Firms, 197
Strategic Plan for Southwest Indian Community's Construction Business, 190
Strategic Planning: Developments and Improvements, 900
System Interrelations of Organizational Variables, 896
Technology Strategy and Competitive Performance in Bridge Construction, 166

Stratification
Intertidal Motions within Deep Basin of Swan River Estuary, 738
Review of Recent Developments in Tidal Hydrodynamic Modeling. II: Turbulence Energy Models, 677

Stratified flow
Salinity Control in Mississippi River Under Drought Flows, 1361
Stratified Flow Approximation for Sloping Aquifers, 779

Stream gaging
Hysteresis Sensitive Neural Network for Modeling Rating Curves, 122

Streambeds
Ripples on Stream Bed, 651

Streamflow
Estimating Salt Loads in High Water Table Areas. II: Regional Salt Loads, 837
Measurement of Flow under Ice Covers in North America, 757
Metal Transport within a Small Urbanized Watershed, 840
Streamflow and Suspended Sediment Transport in an Urban Environment, 732
Watershed-Specific Model for Streamflow, Sediment, and Metal Transport, 374

Streams
Characterization of Stream Meanders for Stream Restoration, 704
Estimating Non-Point-Source Loads and Associated Water Quality Impacts, 1350
Impact of Barge Traffic on Stream Reaeration: Laboratory Experiments, 452
Large-Volume Samples for *Cryptosporidium* and *Giardia* from Small Streams, 377
Stream Velocity Profiles and Longitudinal Dispersion, 734
Temperature Model for Highly Transient Shallow Streams, 648

Strength
Approach to Evaluation of Hand Strength Given Visual Biofeedback, 352
Behavior of Concrete Columns Confined by Fiber Composites, 1095
Behavior of Precracked RC Beams Strengthened with Carbon FRP Sheets, 134
Characterization of Bearing Strength Factors in Pegged Timber Connections, 1067
Compressive Properties of Structural Clay Tile Prisms, 1135
Deformation Mechanisms of Pure Bitumen, 968
Direct Assessment of Safe Strengths of RC Slabs under Membrane Action, 1184
Duration of Constant and Ramp Loading on Strength of Wood, 270
Effect of Discrete Member Size on Reliability of Wood Beams, 1124
Flowable Slurry Containing Foundry Sands, 965
Inelastic Buckling of Steel Beams with Central Torsional Restraints, 1166
Influence of Bend Radii on Local Buckling in Cold Formed Shapes, 1225
Limit Analysis of Reinforced Concrete Beams Subjected to Pure Torsion, 1037
Low Temperature Strength and Notch Sensitivity of Glass Mat Polypropylene, 89
Optimal Spherical Masonry Domes of Uniform Strength, 1052
Strength Curves for Metal Columns, 1111
Strength of Composite Sections with Foamed and Lightweight Aggregate Concrete, 959

Strength of Multiplanar Tubular KK-Joints under Antisymmetrical Axial Loading, 1115
Strength Properties of Autoclaved Cellular Concrete with High Volume Fly Ash, 209
Strength Variability of Conventional Slab Formwork Systems, 189

Stress

Analysis of Piezoresistance Gauges for Stress in Divergent Flow Fields, 217
Analysis of Stress-Change Disturbance Caused by Ideal Drilling in Clay, 587
Anisotropic Elastic Moduli of Granular Assemblies from Micromechanical Approach, 361
Deformation Mechanisms of Pure Bitumen, 968
Factors Affecting Apparent Position of Steady-State Line, 552
Influence of Bend Radii on Local Buckling in Cold Formed Shapes, 1225
Investigating Contact Stresses on Articular Surfaces by 3D Rigid Links, 357
Load-Carrying Capacity for Concrete Slabs on Grade, 1038
Relationship of Bond Stress, Steel Stress, and Slip in Reinforced Concrete, 1036
Stress-Separation Curves for Saline Ice Using Fictitious Crack Model, 318
Thermoelastic Analysis of Polar-Anisotropic Circular Plates, 339
Transformation of Elastic Properties for Lumber with Cross Grain, 1192
Ultimate Strength Matric Stress Relationship, 620

Stress analysis

Approach to Analysis of Composite Structures Subjected to Action of High-Energy Laser Beam, 18
Serviceability Analysis of Concrete Sections under Biaxial Bending, 1041
Tower of Montecchio Stress Analysis of Southeast Wall, 1443

Stress concentration

Rational Model for Multibolted Connections for GFRP Members, 135

Stress distribution

Continuous Panel Reinforced Soil Walls on Rigid Foundations, 617
Investigating Contact Stresses on Articular Surfaces by 3D Rigid Links, 357
Stable Channels with Mobile Bed: Formulation and Numerical Solution, 668

Stress intensity factor

Comparisons of Concrete Fracture Models, 235
Dynamic Analysis of a Propagating Antiplane Interface Crack, 307
LEFM Applications to Concrete Gravity Dams, 310

Stress strain relations

Cyclic Interface and Joint Shear Device Including Pore Pressure Effects, 582
FEM and Analytical Solutions for Buckling of Nonlinear Masonry Members, 1039
General Stress-Strain Equation, 981
Hypoelastic Tridimensional Model for Nonproportional Loading of Plain Concrete, 340
Modeling Turbulence Mechanisms in Flows Over Abrupt Drops in Bed Elevation, 288
Stress-Strain Model for Confined Reinforced Concrete in Bridge Piers, 1100
Stress-Strain Relationship of Confined High-Strength Plain and Fiber Concrete, 975
Time-Dependent Mechanical Response of HDPE Geomembranes, 526
Viscoelastic Analysis of Diametral Compression of Asphalt Concrete, 283

Stress strain relations, soils

Interpretation of Large-Strain Seismic Cross-Hole Tests, 562

Stress waves

Effects of Poisson's Ratio on Impact-Echo Test Analysis, 315

Stress-strain curves

Dynamic Patterning of Shear Bands in Cosserat Continuum, 227
General Stress-Strain Equation, 981
Strength Curves for Metal Columns, 1111

Traffic surveillance
Incident Detection Using Vehicle-Based and Fixed-Location Surveillance, 1269

Traffic volume
Parking Generation of Commercial Developments in Singapore, 1273
Probabilistic Model for Conflicts at Urban Uncontrolled Intersection, 1250
Traffic Flow Forecasting: Comparison of Modeling Approaches, 1275
Urban Airborne and Blood Lead Analyses Using Neural Networks, 1249

Training
Improving Industry Performance Through Integrated Training Programs, 1022
Leadership Development for Engineering Managers, 924
A Leading Program for Undergraduate Engineers, 921
Skills Critical to Long-Term Profitability of Engineering Firms, 903

Transcritical flow
Invalidity of Preissmann Scheme for Transcritical Flow, 714

Transducers
Application of Piezoelectric Film in Cavitation Research, 701
SPT Dynamic Analysis and Measurements, 618

Transfer facilities
Allied Junction/Secaucus Transfer Station: Public/Private Partnership, 1313
Waste Not: The Scottsdale Transfer Station (Available only in Structural Engineering Special Issue), 1544

Transfer functions
Acceleration Transfer Function of Secondary Systems, 293
Causal Hysteretic Element. II: Application, 351
Determination of Transfer Rate Constants and Partition Coefficients for Air Phase Biofilters, 435
Epoxy-Coated and Uncoated Strand Transfer Lengths for PC Panels, 1091
Measurement of Transfer Lengths on Pretensioned Concrete Elements, 1090
Prediction of Effective Saturation Concentration at Spillway Plunge Pools, 746
Stiffness, Flexibility, Impedance, Mobility and Hidden Delta Function. I: Theory, 350

Stochastic Evaluation of Rainfall-Runoff Prediction Performance, 799

Transformations

Buried Point Source in a Poroelastic Half-Space, 317

Effect of Redox Potential and pH on TNT Transformation in Soil-Water Slurries, 483

Exploitation of Linear Features in Surveying and Photogrammetry, 1229

Least Squares Weighted Coordinate Transformation Formulas and Their Applications, 1238

Observations of Wave Transformation near Breaking, 1386

Transformation of Elastic Properties for Lumber with Cross Grain, 1192

Wave Transformation at Pensacola Pass, Florida, 1395

Wave Transformation during Extratropical Storm, 1387

Transient flow

Computation of Energy Dissipation in Transient Flow, 657

Temperature Model for Highly Transient Shallow Streams, 648

Transmission lines

Standing Waves: Transmission Line Failure Caused by Reflected Energy, 1000

Transmission towers

Design of Guyed Electrical Transmission Structures, 1598

Florida's Big Bellies, 1577

Standardization of Steel Pole Design Using Discrete Optimization, 1069

Transparency

Clear Sailing, 1525

Transport phenomena

Absorption and Sorptivity of Cover Concrete, 966

Analytical Model of Two-Dimensional Dispersion in Laterally Nonuniform Axial Velocity Distributions, 737

An Analytical Solution for Fine Particle Accumulation in Soil Filters, 642

Analytical Solutions for Advection and Advection-Diffusion Equations with Spatially Variable Coefficients, 661

Estimating Salt Loads in High Water Table Areas. I: Identifying Processes, 836

Fate and Transport of Metam Spill in Sacramento River, 450

Injection Mode Effects on Tracer Experiments in Columns, 788

Linear Finite-Element Modeling of Contaminant Transport in Ground Water, 501

Making a Map of Public Health Hazards, 1542

Metal Transport within a Small Urbanized Watershed, 840

Modeling Contaminant Migration with Linear Sorption in Strongly Heterogeneous Media, 500

Modeling Flow and Transport in Drainage Areas with Shallow Ground Water, 852

Models for Ground Water Flow and Contamination: Survey and Classification, 1406

NOM and Trace Metal Attenuation During Storm-Water Infiltration, 789

Non-Fickian Transport in Heterogeneous Saturated Porous Media, 221

Particle Transport in Soils: Review of Significant Processes in Infrastructure Systems, 812

Simplified Approach to Particle Tracking Methods for Contaminant Transport, 770

Simulation of NAPL Dissolution in Fractured Permeable Formation: Quasi-steady Behavior, 390

Solute Transport in Simulated Conductivity Fields under Different Irrigations, 874

Spreading of Oil Spilled under Floating Broken Ice, 717

Stochastic Theory for Irregular Stream Modeling. II: Solute Transport, 708

Stratified Flow Approximation for Sloping Aquifers, 779

Tidal Flow and Transport Modeling Using ULTIMATE QUICKEST Scheme, 678

Transport of Nitrates Through Clay Using Electrokinetics, 517

Water Table Depth and Rainfall Timing Effect on BR^- and NO_3^- Transport, 866

Watershed-Specific Model for Streamflow, Sediment, and Metal Transport, 374

Transport rate

Numerical Simulation of Sheetflow as Granular Material, 1397

Transportation

Incentive/Disincentive Provisions in Highway Contracts, 185

Transportation engineering

Life-Cycle Costs of New Construction Materials, 818

Transportation management

Modeling Approach for Transit Rolling-Stock Deterioration Prediction, 1271

Transportation networks

Designing Network Partitions to Improve Maintenance Routing, 822

Transportation planning

Allied Junction/Secaucus Transfer Station: Public/Private Partnership, 1313

Carrying Freight on High-Speed Rail Lines, 1267

Congressional Response to Fragile Foundations: Analysis of Congressional Infrastructure Legislation Introduced Since 1988, 806

DOT Management Actions to Enhance Bridge Durability/Longevity, 1437

Dynamic Ride-Sharing: Theory and Practice, 1281

Issues in Building the European High-Speed Train Network, 809

Modeling Demand for Public Transit Services in Rural Areas, 1270

Parking Generation of Commercial Developments in Singapore, 1273

Transportation systems

On Solid Ground (Available only in the Geoenvironmental Special Issue), 1467

Optimization of Grid Transit System in Heterogeneous Urban Environment, 1244

Transverse loads

Lateral-Torsional Buckling of Singly-Symmetric I-Beams, 1165

Semianalytical Solution of Rectangular Plates, 292

Transverse waves
Standing Waves: Transmission Line Failure Caused by Reflected Energy, 1000

Trap efficiency
Sediment and Heavy Metal Accumulation in Dry Storm Water Detention Basin, 1349

Trapezoidal channels
Two-Dimensional Flow Model for Trapezoidal High-Velocity Channels, 736

Travel demand
Modeling Demand for Public Transit Services in Rural Areas, 1270
Optimization of Grid Transit System in Heterogeneous Urban Environment, 1244

Travel modes
Dynamic Ride-Sharing: Theory and Practice, 1281

Travel patterns
Dynamic Ride-Sharing: Theory and Practice, 1281

Travel time
Frequency of Probe Reports and Variance of Travel Time Estimates, 1279
Intelligent Traffic Data Processing for ITS Applications, 1280

Trenching
CAD-Integrated Excavation and Pipe Laying, 188

Trenchless technology
Manhole Rehab, 1496
Performance Testing of Trenchless Wastewater Line Spot Repairs, 808
Selection Method for Trenchless Technologies, 817
Trenchless Pipeline Projects-Practical Applications, 1652
Trenchless Quality Management (available in Geoenvironmental Engineering Special Issue), 1545

Trends
Aesthetics and Philosophy in Bridge Design in Japan, 41
Changes in Heavy Rainfall in Midwestern United States, 1342
Method for Trend Detection in Climatological Variables, 795
Structural Designs and Construction Technologies for California Highway Bridges, 180

Triaxial compression
Rate Sensitivity of Asphalt Concrete in Triaxial Compression, 963
Triaxial Determination of Shear Strength of Tire Chips, 573

Triaxial stresses
Hypoelastic Tridimensional Model for Nonproportional Loading of Plain Concrete, 340

Triaxial tests
Effects of Initial Density on Soil Instability at High Pressures, 592
Geotechnical Triaxial Soil Testing within Virtual Environment, 103
Liquefaction and Residual Strength of Sands from Drained Triaxial Tests, 546
Resilient Modulus of Cohesive Soils, 535
Ultimate Strength Matric Stress Relationship, 620

Trichloroethylene
Dehalogenation of Chlorinated Organic Compounds by Strong Alkalis, 482
Quantitative Evaluation of Uncertainty in Site-Specific Risk Assessment, 393

Trickle irrigation
Evaluating Pressure Losses in Drip-Irrigation Lines, 825

Trickling filters
Industrial Pretreatment: Trickling Filter Performance and Design, 494
Treatment of Methylethylketone in Air Stream by Biotrickling Filters, 434

Trihalomethanes
Trihalomethane Precursor Model for Lake Youngs, Washington, 1344

Tropical regions
Performance of External Tiled-Wall Systems under Tropical Weathering, 985
Synthetic Generation of Tropical Rainfall Time Series Using an Event-Based Method, 783

Trucks
Communications and Tracking for Construction Vehicles, 179
Determining Need for and Location of Truck Escape Ramps, 1286

Trusses
Advanced Connection Techniques for Cold-Formed Steel Structures, 1044
American Truss Bridge Connections in the 19th Century. I: 1829–1850, 997
American Truss Bridge Connections in the 19th Century. II: 1850–1900, 998
Analysis of Thin-Steel-Plate Shear Walls, 1202
Fracturing Truss Model: Size Effect in Shear Failure of Reinforced Concrete, 360
Genetic Algorithms-Based Methodologies for Design Optimization of Trusses, 1070
Optimal Design of Trusses Using Available Sections, 1107
Parametric Identification of Truss Structures Using Static Strains, 1136
Review of Progressive Failure Analyses for Truss Structures, 1042
Structural Optimization by Genetic Algorithms with Tournament Selection, 120
Wind Loading for Roof Trusses Using ASCE Standard, 1432

Tube joints
Strength of Multiplanar Tubular KK-Joints under Antisymmetrical Axial Loading, 1115

Tubes
Asymmetric Collapse of Braced Tubes, 1171
A Cyclic Nonlinear Model for Concrete-Filled Tubes. I: Formulation, 1113
A Cyclic Nonlinear Model for Concrete-Filled Tubes. II: Verification, 1114
Degradation of Elastic Response of MMC Laminated Tubes Due to Internal Fiber Cracks, 19

Tunnel construction
Cutting Off Water in Queens, 1526
Preloading at the South end of Confignon Tunnel, 560

A Probabilistic Model for A Tunneling Project using A Markov Chain, 203
Rerouting Boston's Utilities, 1571
Tunneling Against Time (Available only in the Geoenvironmental Special Issue), 1457

Tunneling
Compensation Grouting, 1446
A Probabilistic Model for A Tunneling Project using A Markov Chain, 203
Trenchless Quality Management (available in Geoenvironmental Engineering Special Issue), 1545

Tunnels
Rerouting Boston's Utilities, 1571
Watching Under Boston, 1482

Turbidity
Characteristic Analysis of Turbid Underflows, 688
Experimental Study of Reservoir Turbidity Current, 699
Water Quality in Milwaukee, Wisconsin, Versus Intake Crib Location, 425

Turbines
Oxygen Transfer Similitude for Vented Hydroturbine, 700

Turbulence
Amplitude and Turbulence Effects on Bridge Flutter Derivatives, 1056
Direct Measurement of Turbulence Structures in Mixing Jar Using PIV, 380
Environmental and Coastal Hydraulics: Protecting the Aquatic Habitat, 1605
Hydraulics of Resting Pools for Denil Fishways, 711
Maximum Vertical Penetration of Plane Turbulent Negatively Buoyant Jets, 323
Modeling Turbulence Mechanisms in Flows Over Abrupt Drops in Bed Elevation, 288
Preliminary Observations of Turbulent Flow at Culvert Inlets, 658
Review of Recent Developments in Tidal Hydrodynamic Modeling. II: Turbulence Energy Models, 677
Three-Dimensional Computation of Flow Around Groyne, 748
Turbulence Characteristics of New Zealand Gravel-Bed Rivers, 728
Turbulence Model for Water Flow over Two-Dimensional Bed Forms, 686
Turbulence Modulation and Particle Velocities over Flat Sand Beds at Low Transport Rates, 765
Turbulent Bursting-Based Sediment Entrainment Function, 672
Turbulent Structure in Unsteady Depth-Varying Open-Channel Flows, 727

Turbulent flow
Depth-Averaged Hydrodynamic Model in Curvilinear Collocated Grid, 684
Generation of Coherent Structures in Turbulent Boundary Layers, 294
Mechanism of Energy Transportation and Turbulent Flow in a 3D Channel, 718
Modeling of Turbulent Burning Flow and Performance Evaluation of Municipal Solid Incinerator, 505
Observations on Flow in Vertical Dropshafts in Urban Drainage Systems, 424
Preliminary Observations of Turbulent Flow at Culvert Inlets, 658
Unsteady Turbulent Flow Past Solid Fence, 703
Velocity Profiles of Developing and Developed Open Channel Flow, 763

Two layer soil system
Back-Calculation of Parameters for Slab on Two-Layer Foundation System, 1303

Two-dimensional
Time-Dependent Dispersion of Nonergodic Plumes in Two-Dimensional Heterogeneous Aquifers, 784

Two-dimensional analysis
Cable-Stayed Bridges—Parametric Study, 64
Semi-Lagrangian Algorithm for Two-Dimensional Advection-Diffusion Equation on Curvilinear Coordinate Meshes, 685

Two-dimensional flow
Fundamental Properties of Flows in Open Channels with Dead Zone, 656
Two-Dimensional Flow Model for Trapezoidal High-Velocity Channels, 736

Two-dimensional models
2D Numerical Study on Tidal Circulation in Strait of Dover, 1358
Absorbing-Generating Boundary Condition for Shallow Water Models, 1394
Analytical Model of Two-Dimensional Dispersion in Laterally Nonuniform Axial Velocity Distributions, 737
Depth-Averaged Hydrodynamic Model in Curvilinear Collocated Grid, 684
A Numerical Study on Ice Transport in the Vicinity of Niagara River Hydropower Intakes, 94
Plane-strain Modeling of Smear Effects Associated with Vertical Drains, 572
Structural Modeling and Analysis of Modular Falsework Systems, 1174

Ultimate loads
Experimental Investigation of Performance of Wooden Formwork Shores, 989
Interactive Buckling Behavior and Ultimate Load of I-Section Steel Columns, 1170

Ultimate strength
Three-Dimensional Modeling of Concrete Structures. I: Plain Concrete, 1185
Three-Dimensional Modeling of Concrete Structures. II: Reinforced Concrete, 1186

Ultrasonic testing
Ultrasonic Approach for Nondestructive Testing of Civil Infrastructure, 994

Ultraviolet radiation
Estimating Effective Germicidal Dose from Medium Pressure UV Lamps, 504

Uncertainty analysis
Adaptive Control of Nonlinear Uncertain Dynamical Systems, 345
Quantitative Evaluation of Uncertainty in Site-Specific Risk Assessment, 393
Uncertainty Analysis by Point Estimate Methods Incorporating Marginal Distributions, 674
